JOURNAL OF AIRCRAFT
Vol. 44, No. 6, December 2007

2007 *Journal of Aircraft* Index

How to Use the Index

In the Subject Index, pages 2091–2099, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 2100–2102, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 2103–2110, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2007, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Aerodynamics

C07-008 Investigation on the Conditions of Minimum Induced Drag of Closed Wing Systems and C-Wings
C07-058 Autonomous Sensing and Control of Wing Stall Using a Smart Plasma Slat
C07-026 Effect of a Winglet on Normal Blade-Vortex Interaction
C07-030 Effect of a Porosity Strength on Drag Reduction of a Transonic Projectile
C07-060 Experimental Investigation into the Aerodynamics of Battle Damaged Airfoils
C07-100 Development of a Trailing Vortex Formed with Spanwise Tip Jets
C07-041 Iterative Response Surface Based Optimization Scheme for Transonic Airfoil Design
C07-023 Design and Numerical Optimization of Thick Airfoils Including Blunt Trailing Edges
C07-159 Adaptive Airfoil Dynamic Stall Control
C07-106 Predicting Maximum Lift Coefficient for Twisted Wings Using Computational Fluid Dynamics
C07-033 Method Based on Chebyshev Polynomials for Aerservoelastic Interactions on an F/A-18 Aircraft
C07-035 Flow Control by Spanwise Blowing on a NACA 0012
C07-099 Post-Stall Motions Evolving Toward Chaos
C07-028 Aerodynamic Performance of a Biplane Micro Air Vehicle
C07-145 Hybrid Design for Aircraft Wind-Tunnel Testing Using Response Surface Methodologies
C07-170 Lift and Drag Characteristics of a Blended-Wing Body Aircraft
C07-219 Aerodynamic Control of Using Windward-Surface Plasma Actuators on a Separation Ramp
C07-001 Aerodynamic Modeling of Morphing Wings Using an Extended Lifting-Line Analysis
C07-016 Effect of Microvortex Generators On Seperated Normal Shock/ Boundary Layer Interactions
C07-031 Drag and Flutter Characteristics of Loop Membranes
C07-098 Drag Prediction in Transitional Flow Over Airfoils
C07-105 Predicting Maximum Lift Coefficient for Twisted Wings Using Lifting-Line Theory
C07-034 Effect of Flap Motion on Unsteady Aerodynamic Loads
C07-039 Exploratory Investigation of Geometry Effects on Gurney Flap Performance
C07-075 Thin-Airfoil Theoretical Interpretation for Gurney Flap Lift Enhancement
C07-037 Unified Approximation for Nonparabolic Drag Polars
C07-111 Dynamic Wing Airloads with Higher Harmonic Flap Motion
C07-200 Steep-Descent Maneuver of Transport Aircraft
C07-112 Aerodynamic Characteristics of Paradrogue Assembly in an Aerial Refueling System
C07-178 Compressible Unsteady Vortex Lattice Method for Arbitrary Two-Dimensional Motion of Thin Profiles
C07-208 High Resolution Turbulence Treatment of F/A-18 Tail Buffet
C07-202 Two Aspects of Use of Full- and Partial-Span Gurney Flaps
C07-215 Unsteady Numerical Simulation of Wings with Flaperon Flying Over Nonplanar Ground Surface
C07-216 Return from Aerofoil Stall During Ramp-Down Pitching Motions
C07-223 Lift Enhancement by Static Extended Trailing Edge
C07-225 Error Quantification for Computational Aerodynamics Using an Error Transport Equation
C07-174 Actuator-Work Concepts Applied to Unconventional Aerodynamic Control Devices
C07-220 Drag Decomposition-Based Adaptive Mesh Refinement
C07-242 Evaluation of Effectiveness of Periodic Flight by a Hypersonic Vehicle
C07-222 Aerodynamic and Mission Performance of a Winged Balloon Guidance System
C07-211 Design of a Passively Reefed, Collapsible Drogue Parachute System
C07-244 Experimental Studies on Unsteady Lateral Blowing on NACA 0012
C07-224 Upstream Blowing Jet on Transonic Convex-Corner Flow
C07-197 Development and Testing of the Mentor Flapping-Wing Micro Air Vehicle
C07-218 Effect of Thrust-Vectoring Jets on Delta Wing Aerodynamics
C07-092 Extension of Projectile Range Using Oblique-Wing Concept
C07-018 Computational Analysis on Flow Through Transition s-Diffusers: Effect of Inlet Shape
C07-021 Experimental Investigation of Vectoring Jet on Aerodynamic Characteristics of Aircraft
C07-025 Design Guidelines of Rotary Wings in Hover for Insect-Scale Micro Air Vehicle Applications
C07-011 Automatic Transition Prediction and Application to Three-Dimensional Wing Configurations
C07-009 Dynamics of Corotating Vortex Filaments Part 2: Experimental Results
C07-012 Reynolds Number Effects on Off-Design Stability and Control Characteristics of Supersonic Transports
C07-017 Comparison of Reynolds-Averaged Navier–Stokes Simulations of Multi-Element High-Lift Configurations
C07-063 Two-Dimensional Wind Tunnel and Computational Investigation of a Microtab Modified Airfoil
C07-072 Flight Control Using Synthetic Jets on a Cessna 182 Model
C07-015 Robust Design of an Aerodynamic Compensation Pitot-Static Tube for Supersonic Aircraft
C07-038 Weight Criterion on Flow Control in Level Flight
C07-113 Multipoint Aerodynamic Design of Wing-Body Configurations for Minimum Drag
C07-102 Active Separation Control on the Flap of a Two-Dimensional Generic High-Lift Configuration
C07-077 Wave Drag Characteristics of a Low-Drag Supersonic Formation Flying Concept
C07-024 Wake Vorticity Measurements for Low Aspect Ratio Wings at Low Reynolds Number
C07-052 Time-Area-Averaged Momentum Stream Tube Model for Flapping Flight

C07-079 Trailing Vortex Filament: A Novel Similarity Analysis
C07-083 Generalized Empirical Airfoil Stagnation Point Location Prediction
C07-190 Investigation of Surface Roughness on Aerodynamics Properties
C07-185 Computational Study of Submerged Air Inlet Performance Improvement Using Vortex Generators
C07-177 Navier–Stokes Analysis of Airfoils with Gurney Flap
C07-135 Computational Fluid Dynamics Study of Three-Dimensional Dynamic Stall of Various Planform Shapes
C07-149 Effect of Acoustic Slat Modifications on Aerodynamic Properties of High-Lift Systems
C07-128 Problems with Leading-Edge Flow Control Experiments
C07-121 Experimental Study of a Telescopic Morphing Aspect Ratio Wing Inside a Channel
C07-127 Improved Dynamic-Stall-Onset Criterion at Low Mach Numbers
C07-162 Unsteady Aerodynamic Forces Mixed Method for Aeroservoelasticity Studies on an F/A-18 Aircraft
C07-107 Automatic Transition Prediction and Application to Three-Dimensional High-Lift Configurations
C07-116 Aerodynamic Performance Analysis of a Gurney Flap for Rotorcraft Application
C07-049 Advancements in Aircraft Model Force and Attitude Instrumentation by Integrating Statistical Methods
C07-191 Early Flight-Test and Other Boundary-Layer Research at Mississippi State 1949-1960
C07-132 Design and Testing of a Pneumatic Telescopic Wing for Unmanned Aerial Vehicles
C07-189 Aerodynamic Characteristics of a Free-Wing Tilt-Body Unmanned Aerial Vehicle
C07-036 Planform Variations and Aerodynamic Efficiency of Movable Tip Strakes
C07-179 Application of CFD-Based Unsteady Forces for Efficient Aeroelastic Stability Analyses
C07-139 Why Birds and Miniscale Airplanes Need No Vertical Tail
C07-195 Analysis of Wind Tunnel Wall Interference Effects on Subsonic Unsteady Airfoil Flows
C07-096 Study on the Induced Velocity and Noise Characteristics of a Scissors Rotor
C07-165 Prediction of Hovering Rotor Noise Based on Reynolds-Averaged Navier–Stokes Simulation
C07-168 Harmonic Representation of Aerodynamic Lift and Drag Coefficients
C07-158 Optimization of Aifoil Flow Control Using a Genetic Algorithm with Diversity Control
C07-167 Effect of Gurney Flap on Unsteady Wake Vortex
C07-166 Performance of Articulated Flapping Wings with Partial Leading-Edge Suction
C07-148 Aerodynamic Loading for an Airfoil with an Oscillating Gurney Flap
C07-152 Experimental Investigation of Unsteady Flow Separation on a Maneuvering Axisymmetric Body
C07-180 Optimum Shape Design for Unsteady Three-Dimensional Viscous Flows Using a Nonlinear Frequency-Domain Method
C07-192 Experimental Aerodynamic Study of Tandem Flapping Membrane Wings
C07-213 Aerodynamic Characteristics of Bodies of Revolution at Near-Sonic Speeds
C07-164 Hub Drag-Reduction Strategies of Canard Rotor/Wing Unmanned Aerial Vehicles
C07-142 Response Surface Methods for Efficient Complex Aircraft Configuration Aerodynamic Characterization
C07-147 Flowfield of a Rotating-Wing Micro Air Vehicle
C07-169 Experimental Evaluation of Sinusoidal Leading Edges
C07-214 Effects of Strake Planform Change on Vortex Flow of a Double-Delta Wing
C07-217 Effect of Streamwise Slots on the Drag of a Transonic Projectile
C07-203 Effect of Leading-Edge Form on Performance of Wing-Movable Tip Strake Configurations
C07-141 Evaluation of a Simplified Grid Treatment for Oscillating Trailing-Edge Control Surfaces
C07-204 Passive Control of Bluff Body Using Stepped-Nose Obstacle
C07-206 Sensitivity of Aircraft Performance to Icing Parameter Variations
C07-239 Improving the Stability and Efficiency of the Pseudocompressibility Method
C07-245 Aerodynamic Hysteresis of a Low-Reynolds-Number Airfoil

Aeroelasticity and Aeroservoelasticity

C07-104 CFD-Based Models of Aerodynamic Gust Response
C07-141 Evaluation of a Simplified Grid Treatment for Oscillating Trailing-Edge Control Surfaces
C07-137 Supersonic Nonlinear Panel Flutter Suppression Using Shape Memory Alloys
C07-172 Active Tiltrotor Whirl-Flutter Stability Augmentation Using Wing-Flaperon and Swash-Plate Actuation
C07-163 Modeling the Benchmark Active Controls Wing Through Linear and Computational Aeroelastic Analyses
C07-088 Investigation of Membrane Actuation for Roll Control of a Micro Air Vehicle
C07-114 Fuzzy-Logic-Based Health Monitoring and Residual-Life Prediction for Composite Helicopter Rotor
C07-179 Application of CFD-Based Unsteady Forces for Efficient Aeroelastic Stability Analyses
C07-162 Unsteady Aerodynamic Forces Mixed Method for Aeroservoelasticity Studies on an F/A-18 Aircraft
C07-119 Surface Splines Generalization and Large Deflection Interpolation
C07-073 Cantilevered Plate Rayleigh–Ritz Trial Function Selection for von Kármán's Plate Equations
C07-006 Transient and Limit Cycle Simulation of a Nonlinear Aeroelastic System
C07-174 Actuator-Work Concepts Applied to Unconventional Aerodynamic Control Devices
C07-208 High Resolution Turbulence Treatment of F/A-18 Tail Buffet
C07-188 Thermal Buckling and Nonlinear Flutter Behavior of Functionally Graded Material Panels
C07-240 Bending-Torsion Divergence of a Clamped-Clamped Composite Wing
C07-236 Parametric Studies on Ground Vibration Test Modeling for Highly Flexible Aircraft
C07-234 Assessment of Critical Fuel Configurations Using Robust Flutter Analysis
C07-181 Nonlinear Flight Dynamics of Very Flexible Aircraft
C07-117 Reduced Order Aerodynamic Model for Aeroelastic Analysis of Complex Configurations in Incompressible Flow
C07-066 Nonlinear Aeroelastic Analysis for a Control Fin with an Actuator
C07-002 Gust Loads Alleviation Using Special Control Surfaces
C07-005 Computational Aeroelastic Analysis of Store-Induced Limit-Cycle Oscillation
C07-033 Method Based on Chebyshev Polynomials for Aerservoelastic Interactions on an F/A-18 Aircraft
C07-014 Volterra Kernel Extrapolation for Modeling Nonlinear Aeroelastic Systems at Novel Flight Conditions
C07-067 Case of Explosive Wing-Flaperon Flutter
C07-246 Reduced-Order-Model-Based Flutter Analysis at High Angle of Attack

Air Transportation

C07-176 Coupled Vehicle Design and Network Flow Optimization for Air Transportation Systems
C07-146 System-of-Systems Inspired Aircraft Sizing and Airline Resource Allocation via Decomposition
C07-077 Wave Drag Characteristics of a Low-Drag Supersonic Formation Flying Concept
C07-156 Potential Impacts of Very Light Jets in the National Airspace System
C07-062 Wake of Transport Flying Wings
C07-140 Methodology for Optimizing Parameters of Noise-Abatement Approach Procedures

Airframe-Propulsion Integration

C07-175 Shape Memory Alloy Based Smart Landing Gear for an Airship
C07-237 Proposal to Use Reaction Jets for Variable Stability Airplanes

Airframe-Weapon System Integration

C07-118 Comparison of Computational Fluid Dynamics Approaches for Simulating Weapons Bay Flow

Civil Missions and Transportation

C07-043 Improved Algorithm for Takeoff Monitoring
C07-210 Determination of Minimum Thrust Requirement for a Passenger Aircraft
C07-077 Wave Drag Characteristics of a Low-Drag Supersonic Formation Flying Concept

Collision Avoidance

C07-061 On the Probability of Collision Between Climbing and Descending Aircraft

Communication and Air Traffic Control

C07-156 Potential Impacts of Very Light Jets in the National Airspace System

Configuration Design

C07-078 Particle Swarm Approach in Finding Optimum Aircraft Configuration
C07-056 Aeromechanics Analysis of a Heavy Lift Slowed-Rotor Compound Helicopter
C07-062 Wake of Transport Flying Wings

C07-101 Multi-Objective Aerodynamic Exploration of Elements' Setting for High-Lift Airfoil Using Kriging Model
C07-036 Planform Variations and Aerodynamic Efficiency of Movable Tip Strakes
C07-084 Tradeoffs in Jet Inlet Design: A Historical Perspective
C07-210 Determination of Minimum Thrust Requirement for a Passenger Aircraft
C07-226 New Computational Procedure for Incorporating Computational Fluid Dynamics into Sonic Boom Prediction
C07-203 Effect of Leading-Edge Form on Performance of Wing-Movable Tip Strake Configurations
C07-171 Preliminary Aerostructural Optimization of a Large Business Jet
C07-192 Experimental Aerodynamic Study of Tandem Flapping Membrane Wings
C07-164 Hub Drag-Reduction Strategies of Canard Rotor/Wing Unmanned Aerial Vehicles
C07-169 Experimental Evaluation of Sinusoidal Leading Edges
C07-028 Aerodynamic Performance of a Biplane Micro Air Vehicle
C07-039 Exploratory Investigation of Geometry Effects on Gurney Flap Performance
C07-055 Computational Analysis of Wake Vortices Generated by Notched Wings
C07-004 Aircraft Geometry Design and Optimization for Sonic Boom Reduction
C07-174 Actuator-Work Concepts Applied to Unconventional Aerodynamic Control Devices
C07-146 System-of-Systems Inspired Aircraft Sizing and Airline Resource Allocation via Decomposition
C07-211 Design of a Passively Reefed, Collapsible Drogue Parachute System
C07-012 Reynolds Number Effects on Off-Design Stability and Control Characteristics of Supersonic Transports

Deceleration Systems

C07-042 Geometric Properties of Parachutes Using 3-D Laser Scanning
C07-211 Design of a Passively Reefed, Collapsible Drogue Parachute System
C07-120 Momentum-Impulse Balance and Parachute Inflation: Fixed Point Drops
C07-081 Momentum-Impulse Balance and Parachute Inflation: Disreefing
C07-059 Universality Considerations for Graphing Parachute Opening Shock Factor Versus Mass Ratio
C07-031 Drag and Flutter Characteristics of Loop Membranes
C07-124 Momentum-Impulse Balance and Parachute Inflation: Rocket-Propelled Payloads
C07-080 Momentum-Impulse Balance and Parachute Inflation: Clusters

Economics

C07-125 Method for Multivariate Analysis with Small Sample in Aircraft Cost Estimation

Flight Control Integration

C07-168 Harmonic Representation of Aerodynamic Lift and Drag Coefficients
C07-072 Flight Control Using Synthetic Jets on a Cessna 182 Model

Flight Mechanics

C07-237 Proposal to Use Reaction Jets for Variable Stability Airplanes
C07-200 Steep-Descent Maneuver of Transport Aircraft
C07-109 Simplified Rotor Inflow Model for Descent Flight
C07-037 Unified Approximation for Nonparabolic Drag Polars
C07-061 On the Probability of Collision Between Climbing and Descending Aircraft
C07-060 Experimental Investigation into the Aerodynamics of Battle Damaged Airfoils
C07-081 Momentum-Impulse Balance and Parachute Inflation: Disreefing
C07-120 Momentum-Impulse Balance and Parachute Inflation: Fixed Point Drops
C07-168 Harmonic Representation of Aerodynamic Lift and Drag Coefficients
C07-124 Momentum-Impulse Balance and Parachute Inflation: Rocket-Propelled Payloads
C07-139 Why Birds and Miniscale Airplanes Need No Vertical Tail
C07-080 Momentum-Impulse Balance and Parachute Inflation: Clusters
C07-128 Problems with Leading-Edge Flow Control Experiments

Flight Operations

C07-010 Implementing Time-Based Spacing for Decelerating Approaches
C07-242 Evaluation of Effectiveness of Periodic Flight by a Hypersonic Vehicle

Flow Control

C07-221 Forebody Geometry Effects on the Flow of a Blunt-Nose Projectile at High Alpha
C07-244 Experimental Studies on Unsteady Lateral Blowing on NACA 0012
C07-072 Flight Control Using Synthetic Jets on a Cessna 182 Model
C07-063 Two-Dimensional Wind Tunnel and Computational Investigation of a Microtab Modified Airfoil
C07-069 Adaptive Compensation Control of Synthetic Jet Actuator Arrays for Airfoil Virtual Shaping
C07-223 Lift Enhancement by Static Extended Trailing Edge
C07-159 Adaptive Airfoil Dynamic Stall Control
C07-035 Flow Control by Spanwise Blowing on a NACA 0012
C07-054 Effect of Swirl Flows in Aeronautical Mix Manifolds
C07-058 Autonomous Sensing and Control of Wing Stall Using a Smart Plasma Slat
C07-111 Dynamic Wing Airloads with Higher Harmonic Flap Motion
C07-020 Robust Multivariable Closed-Loop Control of a Turbulent Backward-Facing Step Flow
C07-075 Thin-Airfoil Theoretical Interpretation for Gurney Flap Lift Enhancement
C07-219 Aerodynamic Control of Using Windward-Surface Plasma Actuators on a Separation Ramp
C07-016 Effect of Microvortex Generators On Seperated Normal Shock/ Boundary Layer Interactions
C07-050 Reynolds-Averaged Navier–Stokes Analysis of Zero Efflux Flow Control over a Hump Model
C07-102 Active Separation Control on the Flap of a Two-Dimensional Generic High-Lift Configuration
C07-038 Weight Criterion on Flow Control in Level Flight
C07-128 Problems with Leading-Edge Flow Control Experiments
C07-167 Effect of Gurney Flap on Unsteady Wake Vortex
C07-148 Aerodynamic Loading for an Airfoil with an Oscillating Gurney Flap
C07-150 Plasma Actuators for Hingeless Aerodynamic Control of an Unmanned Air Vehicle
C07-214 Effects of Strake Planform Change on Vortex Flow of a Double-Delta Wing
C07-217 Effect of Streamwise Slots on the Drag of a Transonic Projectile
C07-204 Passive Control of Bluff Body Using Stepped-Nose Obstacle
C07-245 Aerodynamic Hysteresis of a Low-Reynolds-Number Airfoil

Fuels and Fuel Systems

C07-112 Aerodynamic Characteristics of Paradrogue Assembly in an Aerial Refueling System
C07-234 Assessment of Critical Fuel Configurations Using Robust Flutter Analysis

General Aviation

C07-027 Current Experimental Basis for Modeling Ice Accretions on Swept Wings
C07-067 Case of Explosive Wing-Flaperon Flutter
C07-004 Aircraft Geometry Design and Optimization for Sonic Boom Reduction
C07-201 Comparative Flight Tests with and Without Tip Tanks
C07-156 Potential Impacts of Very Light Jets in the National Airspace System

Ground Effect Machines

C07-215 Unsteady Numerical Simulation of Wings with Flaperon Flying Over Nonplanar Ground Surface

Landing Dynamics

C07-228 Closed-Form Analytical Solution for the Shimmy Instability of Nose-Wheel Landing Gears
C07-229 Lateral Response of Nonlinear Nose-Wheel Landing Gear Models with Torsional Free Play
C07-230 Lateral Response of Nose-Wheel Landing Gear System to Ground-Induced Excitation
C07-184 Application of Probability Methods to Assess Airframe Crash Modeling Uncertainty

Lighter-Than-Air Systems

C07-243 Effect of High-Altitude Airship's Attitude on Performance of its Energy System
C07-222 Aerodynamic and Mission Performance of a Winged Balloon Guidance System
C07-068 Near-Space Station-Keeping Performance of a Large High-Altitude Notional Airship
C07-173 Analysis and Design of Robust Helium Aerostats
C07-074 Structures of the Low-Altitude Stationary Flight Test Vehicle

C07-091 Unstable, Cyclically Symmetric and Stable, Asymmetric Pumpkin-Balloon Configurations

Manufacturing

C07-136 Automated Aircraft Sheet Metal Component Production Technologies

Micro Air Vehicles

C07-129 Morphing Wing Flight Control Via Postbuckled Precompressed Piezoelectric Actuators
C07-022 Modelization and Kinematics Optimization for a Flapping-Wing Microair Vehicle
C07-197 Development and Testing of the Mentor Flapping-Wing Micro Air Vehicle
C07-207 Experimental Study of a Micro Air Vehicle with a Rotatable Tail
C07-028 Aerodynamic Performance of a Biplane Micro Air Vehicle
C07-088 Investigation of Membrane Actuation for Roll Control of a Micro Air Vehicle
C07-139 Why Birds and Miniscale Airplanes Need No Vertical Tail
C07-024 Wake Vorticity Measurements for Low Aspect Ratio Wings at Low Reynolds Number
C07-147 Flowfield of a Rotating-Wing Micro Air Vehicle
C07-186 Streamwise Vorticity in Simple Mechanical Flapping Wings
C07-192 Experimental Aerodynamic Study of Tandem Flapping Membrane Wings

Noise

C07-140 Methodology for Optimizing Parameters of Noise-Abatement Approach Procedures
C07-143 Experimental Training and Validation of a System for Aircraft Acoustic Signature Identification
C07-096 Study on the Induced Velocity and Noise Characteristics of a Scissors Rotor
C07-004 Aircraft Geometry Design and Optimization for Sonic Boom Reduction
C07-200 Steep-Descent Maneuver of Transport Aircraft
C07-003 Analysis of the Airframe Noise of an A320/A321 with a Parametric Method

Performance

C07-068 Near-Space Station-Keeping Performance of a Large High-Altitude Notional Airship
C07-043 Improved Algorithm for Takeoff Monitoring
C07-037 Unified Approximation for Nonparabolic Drag Polars
C07-044 Study of Near-Optimal Endurance-Maximizing Periodic Cruise Trajectories
C07-201 Comparative Flight Tests with and Without Tip Tanks

Powerplant Integration

C07-210 Determination of Minimum Thrust Requirement for a Passenger Aircraft
C07-084 Tradeoffs in Jet Inlet Design: A Historical Perspective

Rotorcraft

C07-096 Study on the Induced Velocity and Noise Characteristics of a Scissors Rotor
C07-165 Prediction of Hovering Rotor Noise Based on Reynolds-Averaged Navier–Stokes Simulation
C07-114 Fuzzy-Logic-Based Health Monitoring and Residual-Life Prediction for Composite Helicopter Rotor
C07-116 Aerodynamic Performance Analysis of a Gurney Flap for Rotorcraft Application
C07-056 Aeromechanics Analysis of a Heavy Lift Slowed-Rotor Compound Helicopter
C07-198 Flight Test Evaluation of a Helicopter Airborne Lidar
C07-122 Semi-Active Control of Vertical Stroking Helicopter Crew Seat for Enhanced Crashworthiness
C07-094 Two-Dimensional Unsteady Aerodynamic Application to Higher Harmonic Control Test Data
C07-079 Trailing Vortex Filament: A Novel Similarity Analysis
C07-227 Distributed Rate-Dependent Elastoslide Model for Elastomeric Lag Dampers
C07-238 Ground Dynamics Model Validation by Use of Landing Flight Test
C07-147 Flowfield of a Rotating-Wing Micro Air Vehicle
C07-172 Active Tiltrotor Whirl-Flutter Stability Augmentation Using Wing-Flaperon and Swash-Plate Actuation
C07-159 Adaptive Airfoil Dynamic Stall Control
C07-025 Design Guidelines of Rotary Wings in Hover for Insect-Scale Micro Air Vehicle Applications
C07-109 Simplified Rotor Inflow Model for Descent Flight
C07-205 In-Flight GPS-Signal-Reception Anomalies of Helicopters

Safety

C07-065 Finite Element Modeling of a Bird Striking an Engine Fan Blade
C07-043 Improved Algorithm for Takeoff Monitoring
C07-060 Experimental Investigation into the Aerodynamics of Battle Damaged Airfoils
C07-095 Characterization of Aircraft Wake Vortices by Airborne Coherent Doppler Lidar
C07-061 On the Probability of Collision Between Climbing and Descending Aircraft
C07-086 Ultrasonic Method for Aircraft Wake Vortex Detection
C07-122 Semi-Active Control of Vertical Stroking Helicopter Crew Seat for Enhanced Crashworthiness
C07-090 Corrosion Pillowing in Aircraft Fuselage Lap Joints

Simulation

C07-123 Dynamic Coupling of the KC-135 Tanker and Boom for Modeling and Simulation
C07-101 Multi-Objective Aerodynamic Exploration of Elements' Setting for High-Lift Airfoil Using Kriging Model
C07-162 Unsteady Aerodynamic Forces Mixed Method for Aeroservoelasticity Studies on an F/A-18 Aircraft
C07-108 Motion-Visual Phase-Error Detection in a Flight Simulator
C07-080 Momentum-Impulse Balance and Parachute Inflation: Clusters
C07-048 Perception Model Analysis of Flight Simulator Motion for a Decrab Maneuver
C07-053 Wake Vortex Model for Real-Time Flight Simulation Based on Large Eddy Simulation
C07-151 Residual Stress/Strain in Three-Row, Countersunk, Riveted Lap Joints
C07-238 Ground Dynamics Model Validation by Use of Landing Flight Test
C07-120 Momentum-Impulse Balance and Parachute Inflation: Fixed Point Drops
C07-081 Momentum-Impulse Balance and Parachute Inflation: Disreefing
C07-109 Simplified Rotor Inflow Model for Descent Flight
C07-228 Closed-Form Analytical Solution for the Shimmy Instability of Nose-Wheel Landing Gears
C07-243 Effect of High-Altitude Airship's Attitude on Performance of its Energy System
C07-230 Lateral Response of Nose-Wheel Landing Gear System to Ground-Induced Excitation
C07-229 Lateral Response of Nonlinear Nose-Wheel Landing Gear Models with Torsional Free Play

STOL/VTOL/STOVL

C07-172 Active Tiltrotor Whirl-Flutter Stability Augmentation Using Wing-Flaperon and Swash-Plate Actuation
C07-164 Hub Drag-Reduction Strategies of Canard Rotor/Wing Unmanned Aerial Vehicles
C07-189 Aerodynamic Characteristics of a Free-Wing Tilt-Body Unmanned Aerial Vehicle
C07-116 Aerodynamic Performance Analysis of a Gurney Flap for Rotorcraft Application

Structural Design (Including Loads)

C07-184 Application of Probability Methods to Assess Airframe Crash Modeling Uncertainty
C07-126 Interval Analysis-Based Optimum Design of Wing Structures Under Taxiing Loads
C07-151 Residual Stress/Strain in Three-Row, Countersunk, Riveted Lap Joints
C07-183 Measured Statistics of Multicomponent Gust Patterns in Atmospheric Turbulence
C07-153 Residual Strength of Panels with Cracks Based on a Plastic Hinge
C07-173 Analysis and Design of Robust Helium Aerostats
C07-019 A Tensile Stress Concentration Equation for Countersunk Holes
C07-196 Hybrid III Numerical Model for Aircraft Seat Crash Performance Assessment
C07-074 Structures of the Low-Altitude Stationary Flight Test Vehicle

Structural Materials

C07-074 Structures of the Low-Altitude Stationary Flight Test Vehicle
C07-175 Shape Memory Alloy Based Smart Landing Gear for an Airship
C07-090 Corrosion Pillowing in Aircraft Fuselage Lap Joints

System Effectiveness

C07-176 Coupled Vehicle Design and Network Flow Optimization for Air Transportation Systems

Testing, Flight and Ground

C07-003 Analysis of the Airframe Noise of an A320/A321 with a Parametric Method

C07-012 Reynolds Number Effects on Off-Design Stability and Control Characteristics of Supersonic Transports
C07-145 Hybrid Design for Aircraft Wind-Tunnel Testing Using Response Surface Methodologies
C07-045 Fast Identification and Characterization of Nonlinearities in Experimental Modal Analysis of Large Aircraft
C07-049 Advancements in Aircraft Model Force and Attitude Instrumentation by Integrating Statistical Methods
C07-191 Early Flight-Test and Other Boundary-Layer Research at Mississippi State 1949-1960
C07-094 Two-Dimensional Unsteady Aerodynamic Application to Higher Harmonic Control Test Data
C07-198 Flight Test Evaluation of a Helicopter Airborne Lidar
C07-238 Ground Dynamics Model Validation by Use of Landing Flight Test
C07-201 Comparative Flight Tests with and Without Tip Tanks
C07-142 Response Surface Methods for Efficient Complex Aircraft Configuration Aerodynamic Characterization

Uninhabited and Unmanned Air Vehicles

C07-150 Plasma Actuators for Hingeless Aerodynamic Control of an Unmanned Air Vehicle
C07-132 Design and Testing of a Pneumatic Telescopic Wing for Unmanned Aerial Vehicles
C07-189 Aerodynamic Characteristics of a Free-Wing Tilt-Body Unmanned Aerial Vehicle
C07-039 Exploratory Investigation of Geometry Effects on Gurney Flap Performance
C07-219 Aerodynamic Control of Using Windward-Surface Plasma Actuators on a Separation Ramp
C07-218 Effect of Thrust-Vectoring Jets on Delta Wing Aerodynamics
C07-197 Development and Testing of the Mentor Flapping-Wing Micro Air Vehicle
C07-235 Optimum Aeroelastic Design of a Flapping Wing
C07-112 Aerodynamic Characteristics of Paradrogue Assembly in an Aerial Refueling System

Vibration

C07-045 Fast Identification and Characterization of Nonlinearities in Experimental Modal Analysis of Large Aircraft
C07-227 Distributed Rate-Dependent Elastoslide Model for Elastomeric Lag Dampers

Weather Hazards

C07-183 Measured Statistics of Multicomponent Gust Patterns in Atmospheric Turbulence
C07-029 Calibration and Use of Goodrich Model 0871FA Ice Detectors in Icing Wind Tunnels
C07-027 Current Experimental Basis for Modeling Ice Accretions on Swept Wings
C07-093 Local and Total Density Measurements in Ice Shapes
C07-212 Investigation of Relative Humidity and Induced-Vortex Effects on Aircraft Icing

COMPUTING, INFORMATION, AND COMMUNICATION

Avionics Systems

C07-160 Magnetometer Autocalibration Leveraging Measurement Locus Constraints

Controls and Displays

C07-085 Cueing System for Near-Term Implementation of Aircraft Noise Abatement Approach Procedures

ENERGY

Fuel Cells

C07-241 Specific Weight: A Challenge for a Fuel-Cell-Powered Electric Helicopter

Solar Power

C07-243 Effect of High-Altitude Airship's Attitude on Performance of its Energy System
C07-068 Near-Space Station-Keeping Performance of a Large High-Altitude Notional Airship

Wind Power

C07-063 Two-Dimensional Wind Tunnel and Computational Investigation of a Microtab Modified Airfoil
C07-023 Design and Numerical Optimization of Thick Airfoils Including Blunt Trailing Edges

FLIGHT SIMULATOR SYSTEMS

Human–Computer Interactions

C07-085 Cueing System for Near-Term Implementation of Aircraft Noise Abatement Approach Procedures
C07-108 Motion-Visual Phase-Error Detection in a Flight Simulator

MEMS

C07-025 Design Guidelines of Rotary Wings in Hover for Insect-Scale Micro Air Vehicle Applications

FLUID DYNAMICS

Aeroacoustics

C07-165 Prediction of Hovering Rotor Noise Based on Reynolds-Averaged Navier–Stokes Simulation
C07-161 Influence of Vortex Core on Wake Vortex Sound Emission
C07-226 New Computational Procedure for Incorporating Computational Fluid Dynamics into Sonic Boom Prediction

Boundary Layers and Heat Transfer-Laminar

C07-070 Numerical Simulation of Airfoil Thermal Anti-Ice Operation, Part 1: Mathematical Modeling
C07-071 Numerical Simulation of Airfoil Thermal Anti-Ice Operation, Part 2: Implementation and Results

Boundary Layers and Heat Transfer-Turbulent

C07-071 Numerical Simulation of Airfoil Thermal Anti-Ice Operation, Part 2: Implementation and Results
C07-070 Numerical Simulation of Airfoil Thermal Anti-Ice Operation, Part 1: Mathematical Modeling

Boundary-Layer Stability and Transition

C07-170 Lift and Drag Characteristics of a Blended-Wing Body Aircraft
C07-098 Drag Prediction in Transitional Flow Over Airfoils
C07-011 Automatic Transition Prediction and Application to Three-Dimensional Wing Configurations
C07-245 Aerodynamic Hysteresis of a Low-Reynolds-Number Airfoil
C07-191 Early Flight-Test and Other Boundary-Layer Research at Mississippi State 1949-1960
C07-107 Automatic Transition Prediction and Application to Three-Dimensional High-Lift Configurations
C07-103 Effect of Oscillation on Boundary-Layer Development with Adverse Pressure Gradients

Computational Fluid Dynamics

C07-177 Navier–Stokes Analysis of Airfoils with Gurney Flap
C07-185 Computational Study of Submerged Air Inlet Performance Improvement Using Vortex Generators
C07-149 Effect of Acoustic Slat Modifications on Aerodynamic Properties of High-Lift Systems
C07-113 Multipoint Aerodynamic Design of Wing-Body Configurations for Minimum Drag
C07-015 Robust Design of an Aerodynamic Compensation Pitot-Static Tube for Supersonic Aircraft
C07-107 Automatic Transition Prediction and Application to Three-Dimensional High-Lift Configurations
C07-179 Application of CFD-Based Unsteady Forces for Efficient Aeroelastic Stability Analyses
C07-195 Analysis of Wind Tunnel Wall Interference Effects on Subsonic Unsteady Airfoil Flows
C07-226 New Computational Procedure for Incorporating Computational Fluid Dynamics into Sonic Boom Prediction
C07-239 Improving the Stability and Efficiency of the Pseudocompressibility Method
C07-141 Evaluation of a Simplified Grid Treatment for Oscillating Trailing-Edge Control Surfaces
C07-158 Optimization of Aifoil Flow Control Using a Genetic Algorithm with Diversity Control
C07-180 Optimum Shape Design for Unsteady Three-Dimensional Viscous Flows Using a Nonlinear Frequency-Domain Method
C07-208 High Resolution Turbulence Treatment of F/A-18 Tail Buffet
C07-217 Effect of Streamwise Slots on the Drag of a Transonic Projectile
C07-213 Aerodynamic Characteristics of Bodies of Revolution at Near-Sonic Speeds
C07-011 Automatic Transition Prediction and Application to Three-Dimensional Wing Configurations
C07-018 Computational Analysis on Flow Through Transition s-Diffusers: Effect of Inlet Shape
C07-017 Comparison of Reynolds-Averaged Navier–Stokes Simulations of Multi-Element High-Lift Configurations

C07-220 Drag Decomposition-Based Adaptive Mesh Refinement
C07-092 Extension of Projectile Range Using Oblique-Wing Concept
C07-212 Investigation of Relative Humidity and Induced-Vortex Effects on Aircraft Icing
C07-225 Error Quantification for Computational Aerodynamics Using an Error Transport Equation
C07-134 Unsteady Thermodynamic Computational Fluid Dynamics Simulations of Aircraft Wing Anti-Icing Operation
C07-098 Drag Prediction in Transitional Flow Over Airfoils
C07-138 Analysis Method for Inertial Particle Separator
C07-047 Transonic Computational Fluid Dynamics Calculations on Preproduction F/A-18E for Stability and Control
C07-187 Cartesian-Like Grids Using a Novel Grid-Stitching Algorithm for Viscous Flow Computations
C07-118 Comparison of Computational Fluid Dynamics Approaches for Simulating Weapons Bay Flow
C07-170 Lift and Drag Characteristics of a Blended-Wing Body Aircraft
C07-076 Enhancements of the Cut-Paste Algorithm in Overlapping Grid Generation
C07-001 Aerodynamic Modeling of Morphing Wings Using an Extended Lifting-Line Analysis
C07-055 Computational Analysis of Wake Vortices Generated by Notched Wings
C07-030 Effect of a Porosity Strength on Drag Reduction of a Transonic Projectile
C07-133 Multidisciplinary Design Optimization and Data Mining for Transonic Regional-Jet Wing
C07-106 Predicting Maximum Lift Coefficient for Twisted Wings Using Computational Fluid Dynamics
C07-005 Computational Aeroelastic Analysis of Store-Induced Limit-Cycle Oscillation

Hypersonic Flow

C07-076 Enhancements of the Cut-Paste Algorithm in Overlapping Grid Generation

Inlet, Nozzle, Diffuser, and Channel Flows

C07-084 Tradeoffs in Jet Inlet Design: A Historical Perspective
C07-185 Computational Study of Submerged Air Inlet Performance Improvement Using Vortex Generators

Jets, Wakes, and Viscid-Inviscid Flow Interactions

C07-100 Development of a Trailing Vortex Formed with Spanwise Tip Jets
C07-009 Dynamics of Corotating Vortex Filaments Part 2: Experimental Results
C07-069 Adaptive Compensation Control of Synthetic Jet Actuator Arrays for Airfoil Virtual Shaping

Plasmadynamics and MHD

C07-058 Autonomous Sensing and Control of Wing Stall Using a Smart Plasma Slat

Separated Flows

C07-035 Flow Control by Spanwise Blowing on a NACA 0012
C07-106 Predicting Maximum Lift Coefficient for Twisted Wings Using Computational Fluid Dynamics
C07-050 Reynolds-Averaged Navier–Stokes Analysis of Zero Efflux Flow Control over a Hump Model
C07-105 Predicting Maximum Lift Coefficient for Twisted Wings Using Lifting-Line Theory
C07-020 Robust Multivariable Closed-Loop Control of a Turbulent Backward-Facing Step Flow
C07-224 Upstream Blowing Jet on Transonic Convex-Corner Flow
C07-221 Forebody Geometry Effects on the Flow of a Blunt-Nose Projectile at High Alpha
C07-102 Active Separation Control on the Flap of a Two-Dimensional Generic High-Lift Configuration
C07-152 Experimental Investigation of Unsteady Flow Separation on a Maneuvering Axisymmetric Body
C07-204 Passive Control of Bluff Body Using Stepped-Nose Obstacle

Subsonic Flow

C07-103 Effect of Oscillation on Boundary-Layer Development with Adverse Pressure Gradients
C07-083 Generalized Empirical Airfoil Stagnation Point Location Prediction
C07-149 Effect of Acoustic Slat Modifications on Aerodynamic Properties of High-Lift Systems
C07-195 Analysis of Wind Tunnel Wall Interference Effects on Subsonic Unsteady Airfoil Flows
C07-244 Experimental Studies on Unsteady Lateral Blowing on NACA 0012
C07-017 Comparison of Reynolds-Averaged Navier–Stokes Simulations of Multi-Element High-Lift Configurations
C07-202 Two Aspects of Use of Full- and Partial-Span Gurney Flaps
C07-225 Error Quantification for Computational Aerodynamics Using an Error Transport Equation
C07-082 Aerodynamic Characterization of Grid Fins at Subsonic Speeds
C07-023 Design and Numerical Optimization of Thick Airfoils Including Blunt Trailing Edges

Transonic Flow

C07-041 Iterative Response Surface Based Optimization Scheme for Transonic Airfoil Design
C07-030 Effect of a Porosity Strength on Drag Reduction of a Transonic Projectile
C07-047 Transonic Computational Fluid Dynamics Calculations on Preproduction F/A-18E for Stability and Control
C07-016 Effect of Microvortex Generators On Seperated Normal Shock/ Boundary Layer Interactions
C07-224 Upstream Blowing Jet on Transonic Convex-Corner Flow
C07-092 Extension of Projectile Range Using Oblique-Wing Concept
C07-220 Drag Decomposition-Based Adaptive Mesh Refinement
C07-213 Aerodynamic Characteristics of Bodies of Revolution at Near-Sonic Speeds

Unsteady Flows

C07-186 Streamwise Vorticity in Simple Mechanical Flapping Wings
C07-152 Experimental Investigation of Unsteady Flow Separation on a Maneuvering Axisymmetric Body
C07-180 Optimum Shape Design for Unsteady Three-Dimensional Viscous Flows Using a Nonlinear Frequency-Domain Method
C07-161 Influence of Vortex Core on Wake Vortex Sound Emission
C07-103 Effect of Oscillation on Boundary-Layer Development with Adverse Pressure Gradients
C07-135 Computational Fluid Dynamics Study of Three-Dimensional Dynamic Stall of Various Planform Shapes
C07-235 Optimum Aeroelastic Design of a Flapping Wing
C07-215 Unsteady Numerical Simulation of Wings with Flaperon Flying Over Nonplanar Ground Surface
C07-178 Compressible Unsteady Vortex Lattice Method for Arbitrary Two-Dimensional Motion of Thin Profiles
C07-050 Reynolds-Averaged Navier–Stokes Analysis of Zero Efflux Flow Control over a Hump Model
C07-118 Comparison of Computational Fluid Dynamics Approaches for Simulating Weapons Bay Flow
C07-111 Dynamic Wing Airloads with Higher Harmonic Flap Motion
C07-034 Effect of Flap Motion on Unsteady Aerodynamic Loads
C07-031 Drag and Flutter Characteristics of Loop Membranes

Vortices

C07-095 Characterization of Aircraft Wake Vortices by Airborne Coherent Doppler Lidar
C07-055 Computational Analysis of Wake Vortices Generated by Notched Wings
C07-026 Effect of a Winglet on Normal Blade-Vortex Interaction
C07-054 Effect of Swirl Flows in Aeronautical Mix Manifolds
C07-100 Development of a Trailing Vortex Formed with Spanwise Tip Jets
C07-202 Two Aspects of Use of Full- and Partial-Span Gurney Flaps
C07-212 Investigation of Relative Humidity and Induced-Vortex Effects on Aircraft Icing
C07-218 Effect of Thrust-Vectoring Jets on Delta Wing Aerodynamics
C07-009 Dynamics of Corotating Vortex Filaments Part 2: Experimental Results
C07-135 Computational Fluid Dynamics Study of Three-Dimensional Dynamic Stall of Various Planform Shapes
C07-062 Wake of Transport Flying Wings
C07-079 Trailing Vortex Filament: A Novel Similarity Analysis
C07-086 Ultrasonic Method for Aircraft Wake Vortex Detection
C07-024 Wake Vorticity Measurements for Low Aspect Ratio Wings at Low Reynolds Number
C07-053 Wake Vortex Model for Real-Time Flight Simulation Based on Large Eddy Simulation
C07-161 Influence of Vortex Core on Wake Vortex Sound Emission
C07-036 Planform Variations and Aerodynamic Efficiency of Movable Tip Strakes

C07-186 Streamwise Vorticity in Simple Mechanical Flapping Wings
C07-214 Effects of Strake Planform Change on Vortex Flow of a Double-Delta Wing
C07-203 Effect of Leading-Edge Form on Performance of Wing-Movable Tip Strake Configurations
C07-246 Reduced-Order-Model-Based Flutter Analysis at High Angle of Attack

GUIDANCE, CONTROL, AND DYNAMICS TECHNOLOGY

Aircraft Dynamics

C07-123 Dynamic Coupling of the KC-135 Tanker and Boom for Modeling and Simulation
C07-181 Nonlinear Flight Dynamics of Very Flexible Aircraft
C07-131 Modeling and Flight Control of Large-Scale Morphing Aircraft
C07-110 Neuro-Fuzzy Techniques for the Air-Data Sensor Calibration

Aircraft Guidance

C07-010 Implementing Time-Based Spacing for Decelerating Approaches
C07-193 Assessment of Ionosphere Spatial Decorrelation for Global Positioning System-Based Aircraft Landing Systems

Aircraft Stability and Control

C07-047 Transonic Computational Fluid Dynamics Calculations on Preproduction F/A-18E for Stability and Control
C07-131 Modeling and Flight Control of Large-Scale Morphing Aircraft
C07-033 Method Based on Chebyshev Polynomials for Aerservoelastic Interactions on an F/A-18 Aircraft
C07-099 Post-Stall Motions Evolving Toward Chaos
C07-207 Experimental Study of a Micro Air Vehicle with a Rotatable Tail

Artificial Intelligence

C07-110 Neuro-Fuzzy Techniques for the Air-Data Sensor Calibration

Autonomous Vehicles

C07-194 Autonomous Airborne Refueling of Unmanned Air Vehicles Using the Global Positioning System

Control System Design

C07-134 Unsteady Thermodynamic Computational Fluid Dynamics Simulations of Aircraft Wing Anti-Icing Operation

Control System Sensors

C07-110 Neuro-Fuzzy Techniques for the Air-Data Sensor Calibration

Control Theory

C07-020 Robust Multivariable Closed-Loop Control of a Turbulent Backward-Facing Step Flow
C07-234 Assessment of Critical Fuel Configurations Using Robust Flutter Analysis

Dynamics

C07-123 Dynamic Coupling of the KC-135 Tanker and Boom for Modeling and Simulation

Flight Mechanics

C07-182 Adaptive Stochastic Filtering for Online Aircraft Flight Path Reconstruction
C07-099 Post-Stall Motions Evolving Toward Chaos

Handling Qualities

C07-221 Forebody Geometry Effects on the Flow of a Blunt-Nose Projectile at High Alpha

Intelligent Control

C07-057 Piezoelectric Transducer Actuated Leading Edge De-Icing with Simultaneous Shear and Impulse Forces

Navigation

C07-205 In-Flight GPS-Signal-Reception Anomalies of Helicopters
C07-160 Magnetometer Autocalibration Leveraging Measurement Locus Constraints
C07-194 Autonomous Airborne Refueling of Unmanned Air Vehicles Using the Global Positioning System
C07-193 Assessment of Ionosphere Spatial Decorrelation for Global Positioning System-Based Aircraft Landing Systems

Optimization Techniques

C07-101 Multi-Objective Aerodynamic Exploration of Elements' Setting for High-Lift Airfoil Using Kriging Model
C07-022 Modelization and Kinematics Optimization for a Flapping-Wing Microair Vehicle

Signal Processing

C07-143 Experimental Training and Validation of a System for Aircraft Acoustic Signature Identification

State Estimation

C07-182 Adaptive Stochastic Filtering for Online Aircraft Flight Path Reconstruction

Structural Control

C07-087 Experimental Evaluation of an Advanced Buffet Suppression System on Full Scale F/A-18 Fin
C07-129 Morphing Wing Flight Control Via Postbuckled Precompressed Piezoelectric Actuators

System Identification

C07-014 Volterra Kernel Extrapolation for Modeling Nonlinear Aeroelastic Systems at Novel Flight Conditions
C07-182 Adaptive Stochastic Filtering for Online Aircraft Flight Path Reconstruction

Trajectory Optimization

C07-044 Study of Near-Optimal Endurance-Maximizing Periodic Cruise Trajectories
C07-010 Implementing Time-Based Spacing for Decelerating Approaches

UAVs

C07-160 Magnetometer Autocalibration Leveraging Measurement Locus Constraints
C07-194 Autonomous Airborne Refueling of Unmanned Air Vehicles Using the Global Positioning System

INTERDISCIPLINARY TOPICS

Aerospace Management

C07-115 Failure Forecasting of Aircraft Air Conditioning/Cooling Pack with Field Data

Analytical and Numerical Methods

C07-184 Application of Probability Methods to Assess Airframe Crash Modeling Uncertainty
C07-125 Method for Multivariate Analysis with Small Sample in Aircraft Cost Estimation
C07-231 Analysis of Visual Cues During Landing Phase by Using Neural Network Modeling
C07-064 Analytical Two-Dimensional Model of a Hybrid (Bolted/Bonded) Single-Lap Joint

C07-108 Motion-Visual Phase-Error Detection in a Flight Simulator
C07-085 Cueing System for Near-Term Implementation of Aircraft Noise Abatement Approach Procedures
C07-048 Perception Model Analysis of Flight Simulator Motion for a Decrab Maneuver
C07-122 Semi-Active Control of Vertical Stroking Helicopter Crew Seat for Enhanced Crashworthiness
C07-231 Analysis of Visual Cues During Landing Phase by Using Neural Network Modeling

Lasers and Laser Applications

C07-198 Flight Test Evaluation of a Helicopter Airborne Lidar
C07-042 Geometric Properties of Parachutes Using 3-D Laser Scanning
C07-095 Characterization of Aircraft Wake Vortices by Airborne Coherent Doppler Lidar

Multidisciplinary Design Optimization

C07-046 Ranking Based Uncertainty Quantification for a Multifidelity Design Approach
C07-133 Multidisciplinary Design Optimization and Data Mining for Transonic Regional-Jet Wing
C07-146 System-of-Systems Inspired Aircraft Sizing and Airline Resource Allocation via Decomposition

C07-176 Coupled Vehicle Design and Network Flow Optimization for Air Transportation Systems
C07-209 Design "Feasilization" Using Knowledge-Based Engineering and Optimization Techniques
C07-235 Optimum Aeroelastic Design of a Flapping Wing
C07-126 Interval Analysis-Based Optimum Design of Wing Structures Under Taxiing Loads
C07-113 Multipoint Aerodynamic Design of Wing-Body Configurations for Minimum Drag
C07-171 Preliminary Aerostructural Optimization of a Large Business Jet
C07-158 Optimization of Aifoil Flow Control Using a Genetic Algorithm with Diversity Control Reliability,
Maintainability, and Logistics Support
C07-115 Failure Forecasting of Aircraft Air Conditioning/Cooling Pack with Field Data

Research Facilities and Instrumentation

C07-206 Sensitivity of Aircraft Performance to Icing Parameter Variations
C07-029 Calibration and Use of Goodrich Model 0871FA Ice Detectors in Icing Wind Tunnels

Safety

C07-057 Piezoelectric Transducer Actuated Leading Edge De-Icing with Simultaneous Shear and Impulse Forces
C07-196 Hybrid III Numerical Model for Aircraft Seat Crash Performance Assessment
C07-231 Analysis of Visual Cues During Landing Phase by Using Neural Network Modeling
C07-097 Reliability-Based Aircraft Structural Design Pays, Even with Limited Statistical Data

Sensor Systems

C07-015 Robust Design of an Aerodynamic Compensation Pitot-Static Tube for Supersonic Aircraft
C07-143 Experimental Training and Validation of a System for Aircraft Acoustic Signature Identification
C07-029 Calibration and Use of Goodrich Model 0871FA Ice Detectors in Icing Wind Tunnels

LAUNCH VEHICLE AND MISSILE (LV/M) TECHNOLOGY

Aerodynamics

C07-082 Aerodynamic Characterization of Grid Fins at Subsonic Speeds

Configuration Design

C07-046 Ranking Based Uncertainty Quantification for a Multifidelity Design Approach
C07-013 Design of Waverider Configuration with High Lift-Drag Ratio

Simulation

C07-046 Ranking Based Uncertainty Quantification for a Multifidelity Design Approach

PROPULSION

Airbreathing Propulsion

C07-018 Computational Analysis on Flow Through Transition s-Diffusers: Effect of Inlet Shape

Energy Conservation

C07-044 Study of Near-Optimal Endurance-Maximizing Periodic Cruise Trajectories

Fuel Cells

C07-241 Specific Weight: A Challenge for a Fuel-Cell-Powered Electric Helicopter

Ramjets and Scramjets

C07-242 Evaluation of Effectiveness of Periodic Flight by a Hypersonic Vehicle

Reciprocating Machinery

C07-166 Performance of Articulated Flapping Wings with Partial Leading-Edge Suction

Wind Power

C07-222 Aerodynamic and Mission Performance of a Winged Balloon Guidance System

REAL-TIME SYSTEMS

Software Engineering

C07-053 Wake Vortex Model for Real-Time Flight Simulation Based on Large Eddy Simulation

Systems Engineering

C07-209 Design "Feasilization" Using Knowledge-Based Engineering and Optimization Techniques

SPACE TECHNOLOGY

Global Positioning System

C07-205 In-Flight GPS-Signal-Reception Anomalies of Helicopters
C07-193 Assessment of Ionosphere Spatial Decorrelation for Global Positioning System-Based Aircraft Landing Systems

Spacecraft Structural Configuration, Design, and Analysis

C07-019 A Tensile Stress Concentration Equation for Countersunk Holes

Spacecraft Test and Evaluation

C07-049 Advancements in Aircraft Model Force and Attitude Instrumentation by Integrating Statistical Methods

STRUCTURAL MECHANICS AND MATERIALS

Aeroelasticity and Control

C07-087 Experimental Evaluation of an Advanced Buffet Suppression System on Full Scale F/A-18 Fin
C07-006 Transient and Limit Cycle Simulation of a Nonlinear Aeroelastic System
C07-094 Two-Dimensional Unsteady Aerodynamic Application to Higher Harmonic Control Test Data
C07-119 Surface Splines Generalization and Large Deflection Interpolation
C07-137 Supersonic Nonlinear Panel Flutter Suppression Using Shape Memory Alloys
C07-005 Computational Aeroelastic Analysis of Store-Induced Limit-Cycle Oscillation
C07-002 Gust Loads Alleviation Using Special Control Surfaces
C07-067 Case of Explosive Wing-Flaperon Flutter
C07-007 Active Control of Wing Flutter Using Piezoactuated Surface
C07-240 Bending-Torsion Divergence of a Clamped-Clamped Composite Wing
C07-236 Parametric Studies on Ground Vibration Test Modeling for Highly Flexible Aircraft
C07-181 Nonlinear Flight Dynamics of Very Flexible Aircraft
C07-117 Reduced Order Aerodynamic Model for Aeroelastic Analysis of Complex Configurations in Incompressible Flow
C07-246 Reduced-Order-Model-Based Flutter Analysis at High Angle of Attack

Dynamic Model Analysis

C07-065 Finite Element Modeling of a Bird Striking an Engine Fan Blade
C07-006 Transient and Limit Cycle Simulation of a Nonlinear Aeroelastic System

Flexible and Active Structures

C07-087 Experimental Evaluation of an Advanced Buffet Suppression System on Full Scale F/A-18 Fin
C07-130 Investigation of Self-Resetting Active Multistable Laminates
C07-144 Topology Synthesis of Distributed Actuation Systems for Morphing Wing Structures
C07-007 Active Control of Wing Flutter Using Piezoactuated Surface
C07-042 Geometric Properties of Parachutes Using 3-D Laser Scanning
C07-069 Adaptive Compensation Control of Synthetic Jet Actuator Arrays for Airfoil Virtual Shaping
C07-129 Morphing Wing Flight Control Via Postbuckled Precompressed Piezoelectric Actuators

Materials Structural Properties

C07-051 Effect of Hydrogen and Hold Time on the Lifetime of AF1410 Steel
C07-232 Bending of Bonded Composite Repairs for Aluminum Aircraft Structures: A Design Study

Structural Composite Materials

C07-155 Probabilistic Approach to Damage Tolerance Design of Aircraft Composite Structures
C07-130 Investigation of Self-Resetting Active Multistable Laminates
C07-130 Investigation of Self-Resetting Active Multistable Laminates
C07-114 Fuzzy-Logic-Based Health Monitoring and Residual-Life Prediction for Composite Helicopter Rotor
C07-157 Doubly Curved Anisotropic Sandwich Panels: Modeling and Free Vibration
C07-240 Bending-Torsion Divergence of a Clamped-Clamped Composite Wing
C07-188 Thermal Buckling and Nonlinear Flutter Behavior of Functionally Graded Material Panels

Structural Design

C07-209 Design "Feasilization" Using Knowledge-Based Engineering and Optimization Techniques
C07-173 Analysis and Design of Robust Helium Aerostats
C07-032 Riveting Process Induced Residual Stresses Around Solid Rivets in Mechanical Joints

C07-040 Analysis of the Effects of Interference and Sealant on Riveted Lap Joints
C07-019 A Tensile Stress Concentration Equation for Countersunk Holes
C07-144 Topology Synthesis of Distributed Actuation Systems for Morphing Wing Structures
C07-097 Reliability-Based Aircraft Structural Design Pays, Even with Limited Statistical Data
C07-155 Probabilistic Approach to Damage Tolerance Design of Aircraft Composite Structures
C07-153 Residual Strength of Panels with Cracks Based on a Plastic Hinge
C07-232 Bending of Bonded Composite Repairs for Aluminum Aircraft Structures: A Design Study

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

C07-232 Bending of Bonded Composite Repairs for Aluminum Aircraft Structures: A Design Study
C07-153 Residual Strength of Panels with Cracks Based on a Plastic Hinge
C07-155 Probabilistic Approach to Damage Tolerance Design of Aircraft Composite Structures
C07-090 Corrosion Pillowing in Aircraft Fuselage Lap Joints
C07-089 Fatigue Testing of a Stiffened Lap Joint Curved Fuselage Structure
C07-051 Effect of Hydrogen and Hold Time on the Lifetime of AF1410 Steel
C07-032 Riveting Process Induced Residual Stresses Around Solid Rivets in Mechanical Joints
C07-233 Investigation of the Effect of Metallic Fuselage Dents on Compressive Failure Loads

Structural Dynamics and Characterization

C07-228 Closed-Form Analytical Solution for the Shimmy Instability of Nose-Wheel Landing Gears
C07-236 Parametric Studies on Ground Vibration Test Modeling for Highly Flexible Aircraft
C07-157 Doubly Curved Anisotropic Sandwich Panels: Modeling and Free Vibration
C07-229 Lateral Response of Nonlinear Nose-Wheel Landing Gear Models with Torsional Free Play
C07-230 Lateral Response of Nose-Wheel Landing Gear System to Ground-Induced Excitation
C07-057 Piezoelectric Transducer Actuated Leading Edge De-Icing with Simultaneous Shear and Impulse Forces
C07-073 Cantilevered Plate Rayleigh–Ritz Trial Function Selection for von Kármán's Plate Equations
C07-227 Distributed Rate-Dependent Elastoslide Model for Elastomeric Lag Dampers

Structural Finite Elements

C07-091 Unstable, Cyclically Symmetric and Stable, Asymmetric Pumpkin-Balloon Configurations
C07-065 Finite Element Modeling of a Bird Striking an Engine Fan Blade
C07-196 Hybrid III Numerical Model for Aircraft Seat Crash Performance Assessment
C07-040 Analysis of the Effects of Interference and Sealant on Riveted Lap Joints
C07-032 Riveting Process Induced Residual Stresses Around Solid Rivets in Mechanical Joints
C07-233 Investigation of the Effect of Metallic Fuselage Dents on Compressive Failure Loads
C07-188 Thermal Buckling and Nonlinear Flutter Behavior of Functionally Graded Material Panels
C07-233 Investigation of the Effect of Metallic Fuselage Dents on Compressive Failure Loads

Structural Modeling

C07-157 Doubly Curved Anisotropic Sandwich Panels: Modeling and Free Vibration
C07-064 Analytical Two-Dimensional Model of a Hybrid (Bolted/Bonded) Single-Lap Joint
C07-073 Cantilevered Plate Rayleigh–Ritz Trial Function Selection for von Kármán's Plate Equations

Structural Optimization

C07-097 Reliability-Based Aircraft Structural Design Pays, Even with Limited Statistical Data
C07-126 Interval Analysis-Based Optimum Design of Wing Structures Under Taxiing Loads
C07-088 Investigation of Membrane Actuation for Roll Control of a Micro Air Vehicle
C07-144 Topology Synthesis of Distributed Actuation Systems for Morphing Wing Structures
C07-154 Structural Optimization of a Joined Wing Using Equivalent Static Loads
C07-133 Multidisciplinary Design Optimization and Data Mining for Transonic Regional-Jet Wing

Structural Stability

C07-091 Unstable, Cyclically Symmetric and Stable, Asymmetric Pumpkin-Balloon Configurations
C07-130 Investigation of Self-Resetting Active Multistable Laminates

THERMOPHYSICS AND HEAT TRANSFER

Aerothermodynamics/Thermal Protection

C07-138 Analysis Method for Inertial Particle Separator

Computational Heat Transfer

C07-138 Analysis Method for Inertial Particle Separator
C07-134 Unsteady Thermodynamic Computational Fluid Dynamics Simulations of Aircraft Wing Anti-Icing Operation

Zuo, Liankai, **C07-243**

Chronological Index

C07-001 Aerodynamic Modeling of Morphing Wings Using an Extended Lifting-Line Analysis. Adam Wickenheiser and Ephrahim Garcia, *Cornell University* (**44**, 1, p. 10) Article

C07-002 Gust Loads Alleviation Using Special Control Surfaces. Boris Moulin and Moti Karpel, *Technion–Israel Institute of Technology, Israel* (**44**, 1, p. 17) Article

C07-003 Analysis of the Airframe Noise of an A320/A321 with a Parametric Method. Daniel Blacodon, *ONERA/DSNA, France* (**44**, 1, p. 26) Article based on AIAA Paper 2005-2809

C07-004 Aircraft Geometry Design and Optimization for Sonic Boom Reduction. Sriram K. Rallabhandi and Dimitri N. Mavris, *Georgia Institute of Technology* (**44**, 1, p. 35) Article

C07-005 Computational Aeroelastic Analysis of Store-Induced Limit-Cycle Oscillation. Gregory H. Parker and Raymond C. Maple, *Air Force Institute of Technology*; and Philip S. Beran, *U.S. Air Force Research Laboratory* (**44**, 1, p. 48) Article

C07-006 Transient and Limit Cycle Simulation of a Nonlinear Aeroelastic System. Catharine C. Marsden and Stuart J. Price, *McGill University, Canada* (**44**, 1, p. 60) Article

C07-007 Active Control of Wing Flutter Using Piezoactuated Surface. S. Raja and A. R. Upadhya, *National Aerospace Laboratories, India* (**44**, 1, p. 71) Article

C07-008 Investigation on the Conditions of Minimum Induced Drag of Closed Wing Systems and C-Wings. Luciano Demasi, *University of Washington* (**44**, 1, p. 81) Article

C07-009 Dynamics of Corotating Vortex Filaments Part 2: Experimental Results. Linda K. Kliment, Teresa S. Miller, and Kamran Rokhsaz, *Wichita State University* (**44**, 1, p. 100) Article

C07-010 Implementing Time-Based Spacing for Decelerating Approaches. W. F. de Gaay Fortman, M. M. van Paassen, M. Mulder, and A. C. in 't Veld, *Delft University of Technology, The Netherlands*; and John-Paul Clarke, *Georgia Institute of Technology* (**44**, 1, p. 106) Article based on AIAA Paper 2005-6141

C07-011 Automatic Transition Prediction and Application to Three-Dimensional Wing Configurations. Andreas M. Krumbein, *DLR, German Aerospace Center, Germany* (**44**, 1, p. 119) Article based on AIAA Paper 2006-0914

C07-012 Reynolds Number Effects on Off-Design Stability and Control Characteristics of Supersonic Transports. Lewis R. Owens and Richard A. Wahls, *NASA Langley Research Center*; Michael B. Elzey, *Boeing Commercial Airplane Group*; and Marvine P. Hamner, *LeaTech, LLC* (**44**, 1, p. 134) Article based on AIAA Paper 2002-0417

C07-013 Design of Waverider Configuration with High Lift-Drag Ratio. Yankui Wang, Dongjun Zhang, and Xueying Deng, *Beijing University of Aeronautics and Astronautics, China (PRC)* (**44**, 1, p. 144) Article based on AIAA Paper 2005-6040

C07-014 Volterra Kernel Extrapolation for Modeling Nonlinear Aeroelastic Systems at Novel Flight Conditions. Richard J. Prazenica, *University of Florida*; Patrick H. Reisenthel, *Nielsen Engineering and Research, Inc.*; Andrew J. Kurdila, *Virginia Polytechnic Institute and State University*; and Martin J. Brenner, *NASA Dryden Flight Research Center* (**44**, 1, p. 149) Article based on AIAA Paper 2004-1939

C07-015 Robust Design of an Aerodynamic Compensation Pitot-Static Tube for Supersonic Aircraft. Jehanzeb Masud, Adnan Latif, Shakil Sheikh, and Khalid Parvez, *National University of Sciences and Technology, Pakistan* (**44**, 1, p. 163) Article based on AIAA Paper 2006-1385

C07-016 Effect of Microvortex Generators On Seperated Normal Shock/ Boundary Layer Interactions. Harriet A. Holden and Holger Babinsky, *Cambridge University, Great Britain* (**44**, 1, p. 170) Article

C07-017 Comparison of Reynolds-Averaged Navier–Stokes Simulations of Multi-Element High-Lift Configurations. Mitsuhiro Murayama, Taro Imamura, and Kazuomi Yamamoto, *Japan Aerospace Exploration Agency, Japan*; and Kunihiko Kobayashi, *Ryoyu Systems Company, Ltd., Japan* (**44**, 1, p. 175) Article based on AIAA Paper 2006-1396

C07-018 Computational Analysis on Flow Through Transition s-Diffusers: Effect of Inlet Shape. Krishnendu Saha, Sidh N. Singh, and V. Seshadri, *Indian Institute of Technology, India*; and Suparna Mukhopadhyay, *Lingaya's Institute of Management & Technology, India* (**44**, 1, p. 187) Article

C07-019 A Tensile Stress Concentration Equation for Countersunk Holes. Kunigal N. Shivakumar and Anil Bhargava, *North Carolina A&T University*; and James C. Newman, *Mississippi State University* (**44**, 1, p. 194) Article

C07-020 Robust Multivariable Closed-Loop Control of a Turbulent Backward-Facing Step Flow. Lars Henning and Rudibert King, *Berlin University of Technology, Germany* (**44**, 1, p. 201) Article

C07-021 Experimental Investigation of Vectoring Jet on Aerodynamic Characteristics of Aircraft. Yankui Wang, Xueying Deng, and Yongsheng Zhang, *Beijing University of Aeronautics and Astronautics, China (PRC)* (**44**, 1, p. 209) Article

C07-022 Modelization and Kinematics Optimization for a Flapping-Wing Microair Vehicle. Thomas Rakotomamonjy, *Office National d'Études et de Recherches Aérospatiales, France*; Mustapha Ouladsine, *Laboratoire des Sciences de 'Information et des Systémes, France*; and Thierry Le Moing, *Office National d'Études et de Recherches Aérospatiales, France* (**44**, 1, p. 217) Article

C07-023 Design and Numerical Optimization of Thick Airfoils Including Blunt Trailing Edges. Tobias Winnemöller, *RWTH Aachen University, Germany*; and C. P. van Dam, *University of California, Davis* (**44**, 1, p. 232) Article based on AIAA Paper 2006-238

C07-024 Wake Vorticity Measurements for Low Aspect Ratio Wings at Low Reynolds Number. Sergey Kaplan and Aaron Altman, *University of Dayton*; and Michael Ol, *U.S. Air Force Research Laboratory* (**44**, 1, p. 241) Article based on AIAA Paper 2006-0246

C07-025 Design Guidelines of Rotary Wings in Hover for Insect-Scale Micro Air Vehicle Applications. Noriaki Tsuzuki, *University of Tokyo, Japan*; Shunichi Sato and Takashi Abe, *Institute of Space and Astronautical Science/ Japanese Aerospace Exploration Society, Japan* (**44**, 1, p. 252) Article

C07-026 Effect of a Winglet on Normal Blade-Vortex Interaction. Tim Lee and Edmond Dacca, *McGill University, Canada* (**44**, 1, p. 264) Article

C07-027 Current Experimental Basis for Modeling Ice Accretions on Swept Wings. Mario Vargas, *NASA John H. Glenn Research Center at Lewis Field* (**44**, 1, p. 274) Article based on AIAA Paper 2005-5188

C07-028 Aerodynamic Performance of a Biplane Micro Air Vehicle. Jean-Marc Moschetta and Chinnapat Thipyopas, *Ecole Nationale Superieure de l'Aeronautique et de 'Espace, France* (**44**, 1, p. 291) Article based on AIAA Paper 2005-4613

C07-029 Calibration and Use of Goodrich Model 0871FA Ice Detectors in Icing Wind Tunnels. Richard K. Jeck, *Federal Aviation Administration* (**44**, 1, p. 300) Article

C07-030 Effect of a Porosity Strength on Drag Reduction of a Transonic Projectile. Ahmed Ibrahim and Antonio Filippone, *University of Manchester, Great Britain* (**44**, 1, p. 310) Article

C07-031 Drag and Flutter Characteristics of Loop Membranes. Anna C. Carruthers and Antonio Filippone, *University of Manchester, Great Britain* (**44**, 1, p. 317) Article

C07-032 Riveting Process Induced Residual Stresses Around Solid Rivets in Mechanical Joints. Calvin Rans and Paul V. Straznicky, Carleton University, Canada; and René Alderliesten, *Delft University of Technology, The Netherlands* (**44**, 1, p. 323) Article

C07-033 Method Based on Chebyshev Polynomials for Aerservoelastic Interactions on an F/A-18 Aircraft. Ruxandra M. Botez, Alin D. Dinu, and Iulian Cotoi, *Université du Québec, Canada* (**44**, 1, p. 330) Technical Note

C07-034 Effect of Flap Motion on Unsteady Aerodynamic Loads. Tim Lee, *McGill University, Canada* (**44**, 1, p. 333) Technical Note

C07-035 Flow Control by Spanwise Blowing on a NACA 0012. Chi Wong and Konstantinos Kontis, *University of Manchester, Great Britain* (**44**, 1, p. 337) Technical Note

C07-036 Planform Variations and Aerodynamic Efficiency of Movable Tip Strakes. Vojin R. Nikolic, *Minnesota State University* (**44**, 1, p. 340) Technical Note

C07-037 Unified Approximation for Nonparabolic Drag Polars. Lance W. Traub, *Embry-Riddle Aeronautical University* (**44**, 1, p. 343) Technical Note

C07-038 Weight Criterion on Flow Control in Level Flight. Tianshu Liu, *Western Michigan University* (**44**, 1, p. 346) Technical Note

C07-039 Exploratory Investigation of Geometry Effects on Gurney Flap Performance. Lance W. Traub, *Embry-Riddle Aeronautical University*; and Guarav Agarwal, *Texas A&M University* (**44**, 1, p. 349) Technical Note

C07-040 Analysis of the Effects of Interference and Sealant on Riveted Lap Joints. Amarendra P. Atre and William S. Johnson, *Georgia Institute of Technology* (**44**, 2, p. 353) Article

C07-041 Iterative Response Surface Based Optimization Scheme for Transonic Airfoil Design. Armando Vavalle, *GKN Aerospace, Great Britain*; and Ning Qin, *University of Sheffield, Great Britain* (**44**, 2, p. 365) Article

C07-042 Geometric Properties of Parachutes Using 3-D Laser Scanning. Calvin K. Lee, *U.S. Army Natick Soldier Center*; and Peng Li, *Geo-Centers, Inc.* (**44**, 2, p. 377) Article

C07-043 Improved Algorithm for Takeoff Monitoring. David Zammit-Mangion and Martin Eshelby, *Cranfield University, Great Britain* (**44**, 2, p. 386) Article based on AIAA Paper 2004-6291

C07-044 Study of Near-Optimal Endurance-Maximizing Periodic Cruise Trajectories. Padmanabhan K. Menon and Gregory D. Sweriduk, *Optimal Synthesis Inc.*; and Al H. Bowers, *NASA Dryden Flight Research Center* (**44**, 2, p. 393) Article based on AIAA Paper 2005-6153

C07-045 Fast Identification and Characterization of Nonlinearities in Experimental Modal Analysis of Large Aircraft. Dennis Goege, *Deutsches Zentum für Luft- und Raumfahrt, Germany* (**44**, 2, p. 399) Article

C07-046 Ranking Based Uncertainty Quantification for a Multifidelity Design Approach. J. Umakant, *Defence Research & Development Laboratory, India*; K. Sudhakar and P. M. Mujumdar, *Indian Institute of Technology, India*; and C. Raghavendra Rao, *University of Hyderabad, India* (**44**, 2, p. 410) Article based on AIAA Paper 2006-2149

C07-047 Transonic Computational Fluid Dynamics Calculations on Preproduction F/A-18E for Stability and Control. Bradford F. Green and James J. Chung, *NAVAIR* (**44**, 2, p. 420) Article based on AIAA Paper 2005-6122

C07-048 Perception Model Analysis of Flight Simulator Motion for a Decrab Maneuver. Eric L. Groen, *TNO Defence, Security and Safety, The Netherlands*; M H. Smaili, *National Aerospace Laboratory, The Netherlands*; and Ruud J. Hosman, *AMS Consult, The Netherlands* (**44**, 2, p. 427) Article based on AIAA Paper 2005-6108

C07-049 Advancements in Aircraft Model Force and Attitude Instrumentation by Integrating Statistical Methods. Peter A. Parker and Tom D. Finley, *NASA Langley Research Center* (**44**, 2, p. 436) Article based on AIAA Paper 2005-7603

C07-050 Reynolds-Averaged Navier–Stokes Analysis of Zero Efflux Flow Control over a Hump Model. Christopher L. Rumsey, *NASA Langley Research Center* (**44**, 2, p. 444) Article based on AIAA Paper 2006-1114

C07-051 Effect of Hydrogen and Hold Time on the Lifetime of AF1410 Steel. Amilcar Quispitupa, Basir Shafiq, Oswald N. Uwakweh, Samuel Charca, and Oscar Suarez, *University of Puerto Rico* (**44**, 2, p. 453) Article

C07-052 Time-Area-Averaged Momentum Stream Tube Model for Flapping Flight. Tianshu Liu, *Western Michigan University* (**44**, 2, p. 459) Article

C07-053 Wake Vortex Model for Real-Time Flight Simulation Based on Large Eddy Simulation. Graham T. Spence, Alan Le Moigne, David J. Allerton, and Ning Qin, *University of Sheffield, Great Britain* (**44**, 2, p. 467) Article

C07-054 Effect of Swirl Flows in Aeronautical Mix Manifolds. Rémi Bourlart, *DAHER, France*; Régine Weber and Jacques Hureau, *Laboratoire de Mécanique et d'Energétique, France*; and Fabrice Landais, *DAHER, France* (**44**, 2, p. 476) Article

C07-055 Computational Analysis of Wake Vortices Generated by Notched Wings. Zoubir Zouaoui, Lydie Szkatula, and Richard J. Grant, *NEWI-University of Wales, Great Britain* (**44**, 2, p. 487) Article based on AIAA Paper 2006-245

C07-056 Aeromechanics Analysis of a Heavy Lift Slowed-Rotor Compound Helicopter. Hyeonsoo Yeo and Wayne Johnson, *NASA Ames Research Center* (**44**, 2, p. 501) Article

C07-057 Piezoelectric Transducer Actuated Leading Edge De-Icing with Simultaneous Shear and Impulse Forces. Suresh Venna, Yueh-Jaw Lin, and Galdemir Botura, *University of Akron* (**44**, 2, p. 509) Article

C07-058 Autonomous Sensing and Control of Wing Stall Using a Smart Plasma Slat. Mehul P. Patel and Zak H. Sowle, *Orbital Research Inc.*; Thomas C. Corke and Chuan He, *University of Notre Dame* (**44**, 2, p. 516) Article

C07-059 Universality Considerations for Graphing Parachute Opening Shock Factor Versus Mass Ratio. Jean Potvin, *Saint Louis University* (**44**, 2, p. 528) Article

C07-060 Experimental Investigation into the Aerodynamics of Battle Damaged Airfoils. Peter M. Render, Suraj de Silva, and Andrew Walton, *Loughborough University, Great Britain*; and Mahmoud Mani, *Amirkabir University, Iran* (**44**, 2, p. 539) Article

C07-061 On the Probability of Collision Between Climbing and Descending Aircraft. Luis M. Campos and Joaquim M. Marques, *Instituto Superior Técnico, Portugal* (**44**, 2, p. 550) Article

C07-062 Wake of Transport Flying Wings. Horacio H. Ghigliazza, *Universidad Tecnologica Nacional, Argentinal*; Rodrigo Martinez-Val and Emilio Perez, *Universidad Politecnica de Madrid, Spain*; and Ladislav Smrcek, *Glasgow University, Great Britain* (**44**, 2, p. 558) Article

C07-063 Two-Dimensional Wind Tunnel and Computational Investigation of a Microtab Modified Airfoil. J. P. Baker, K. J. Standish, and C. P. van Dam, *University of California, Davis* (**44**, 2, p. 563) Article based on AIAA Paper 2005-1186

C07-064 Analytical Two-Dimensional Model of a Hybrid (Bolted/Bonded) Single-Lap Joint. Eric Paroissien, Marc Sartor, Jacques Huet, and Frédéric Lachaud, *Institut de Génie Mécanique, France* (**44**, 2, p. 573) Article based on AIAA Paper 2006-2268

C07-065 Finite Element Modeling of a Bird Striking an Engine Fan Blade. Ronghai Mao, Shaker A. Meguid, and Teng Yong Ng, *Nanyang Technological University, Singapore* (**44**, 2, p. 583) Article

C07-066 Nonlinear Aeroelastic Analysis for a Control Fin with an Actuator. Won-Ho Shin and In Lee, *Korea Advanced Institute of Science and Technology, South Korea*; Young-Sug Shin, *Agency for Defense Development, South Korea*; and Jae-Sung Bae, *Hankuk Aviation University, South Korea* (**44**, 2, p. 597) Article

C07-067 Case of Explosive Wing-Flaperon Flutter. Alan Sherwood, *Hawker de Havilland, Australia* (**44**, 2, p. 606) Article

C07-068 Near-Space Station-Keeping Performance of a Large High-Altitude Notional Airship. David K. Schmidt, James Stevens, and Jason Roney, *University of Colorado at Colorado Springs* (**44**, 2, p. 611) Article based on AIAA Paper 2006-6510

C07-069 Adaptive Compensation Control of Synthetic Jet Actuator Arrays for Airfoil Virtual Shaping. Dipankar Deb and Gang Tao, *University of Virginia*; Jason O. Burkholder, Barron Associates, Inc.; and Douglas R. Smith, University of Wyoming (**44**, 2, p. 616) Article

C07-070 Numerical Simulation of Airfoil Thermal Anti-Ice Operation, Part 1: Mathematical Modeling. Guilherme A. Silva, *Empresa Brasileira de Aeronautica, Brazil*; Otavio M. Silvares and Euryale J. Zerbini, *Escola Politecnica da Universidade de Sao Paulo, Brazil* (**44**, 2, p. 627) Article

C07-071 Numerical Simulation of Airfoil Thermal Anti-Ice Operation, Part 2: Implementation and Results. Guilherme A. Silva, Otavio M. Silvares, and Euryale J. Zerbini, *Escola Politecnica da Universidade de Sao Paulo, Brazil*Brazil (**44**, 2, p. 634) Article

C07-072 Flight Control Using Synthetic Jets on a Cessna 182 Model. Marcus Ciuryla, *Rensselaer Polytechnic Institute*; Yong Liu, *Ohio University*; John Farnsworth, *Rensselaer Polytechnic Institute*; Chiman Kwan, *Intelligent Automation, Inc.*; and Michael Amitay, *Rensselaer Polytechnic Institute* (**44**, 2, p. 642) Article

C07-073 Cantilevered Plate Rayleigh–Ritz Trial Function Selection for von Kármán's Plate Equations. Peter J. Attar, *Computational Sciences Branch, Wright–Patterson Air Force Base* (**44**, 2, p. 654) Article

C07-074 Structures of the Low-Altitude Stationary Flight Test Vehicle. Shoji Maekawa and Masaaki Nakadate, *Japan Aerospace Exploration Agency, Japan*; and Atsushi Takegaki, *Fuji Heavy Industries, Inc., Japan* (**44**, 2, p. 662) Article based on AIAA Paper 2005-7407

C07-075 Thin-Airfoil Theoretical Interpretation for Gurney Flap Lift Enhancement. Tianshu Liu and Javier Montefort, *Western Michigan University* (**44**, 2, p. 667) Article

C07-076 Enhancements of the Cut-Paste Algorithm in Overlapping Grid Generation. Chao Yan and Tinghe Li, *Beijing University of Aeronautics and Astronautics, China (PRC)*; and Lei Xie, *Beijing Institute of Technology, China (PRC)* (**44**, 2, p. 672) Technical Note

C07-077 Wave Drag Characteristics of a Low-Drag Supersonic Formation Flying Concept. Yuichiro Goto, *Tohoku University, Japan*; Shigeru Obayashi and Yasuaki Kohama, *Tohoku University, Japan* (**44**, 2, p. 675) Technical Note based on AIAA Paper 2005-4604

C07-078 Particle Swarm Approach in Finding Optimum Aircraft Configuration. Luciano Blasi and Guiseppe Del Core, *Secondá Universitá degli Studi di Napoli, Italy* (**44**, 2, p. 679) Technical Note

C07-079 Trailing Vortex Filament: A Novel Similarity Analysis. Yasser Aboelkassem, *McGill University, Canada* (**44**, 2, p. 683) Technical Note

C07-080 Momentum-Impulse Balance and Parachute Inflation: Clusters. Jean Potvin, *Saint Louis University* (**44**, 2, p. 687) Technical Note

C07-081 Momentum-Impulse Balance and Parachute Inflation: Disreefing. Jean Potvin, *Saint Louis University* (**44**, 2, p. 691) Technical Note

C07-082 Aerodynamic Characterization of Grid Fins at Subsonic Speeds. Theerthamalai Pakkiri, *Defence Research and Development Laboratory, India*dia (**44**, 2, p. 694) Technical Note

C07-083 Generalized Empirical Airfoil Stagnation Point Location Prediction. Hantae Kang and Aaron Altman, *University of Dayton* (**44**, 2, p. 698) Technical Note

C07-084 Tradeoffs in Jet Inlet Design: A Historical Perspective. András Sóbester, *University of Southampton, Great Britain* (**44**, 3, p. 705) History of Key Technologies

C07-085 Cueing System for Near-Term Implementation of Aircraft Noise Abatement Approach Procedures. Nhut T. Ho, *California State University, Northridge*; John-Paul Clarke, *Georgia Institute of Technology*; Robin Riedel and Charles Oman, *Massachusetts Institute of Technology* (**44**, 3, p. 718) Article based on AIAA Paper 2005-7396

C07-086 Ultrasonic Method for Aircraft Wake Vortex Detection. Rebecca J. Rodenhiser, William W. Durgin, and Hamid Johari, *Worcester Polytechnic Institute* (**44**, 3, p. 726) Article based on AIAA Paper 2006-0058

C07-087 Experimental Evaluation of an Advanced Buffet Suppression System on Full Scale F/A-18 Fin. Viresh Wickramasinghe, Yong Chen, and David Zimcik, *National Research Council Canada, Canada* (**44**, 3, p. 733) Article based on AIAA Paper 2006-2136

C07-088 Investigation of Membrane Actuation for Roll Control of a Micro Air Vehicle. Bret Stanford, Mujahid Abdulrahim, Rick Lind, and Peter Ifju, *University of Florida* (**44**, 3, p. 741) Article based on AIAA Paper 2006-2162

C07-089 Fatigue Testing of a Stiffened Lap Joint Curved Fuselage Structure. Abubaker Ahmed and John Bakuckas, *Federal Aviation Administration*; Jonathan Awerbuch, Alan Lau, and Tein-Min Tan, *Drexel University* (**44**, 3, p. 750) Article based on AIAA Paper 2005-2377

C07-090 Corrosion Pillowing in Aircraft Fuselage Lap Joints. Nicholas C. Bellinger, Jerzy P. Komorowski, and Ronald W. Gould, *National Research Council Canada, Canada* (**44**, 3, p. 758) Article based on AIAA Paper 2005-2023

C07-091 Unstable, Cyclically Symmetric and Stable, Asymmetric Pumpkin-Balloon Configurations. Frank E. Baginski, *George Washington University*; Kenneth A. Brakke, *Susquehanna University*; and Willi W. Schur, *Accomac, VA* (**44**, 3, p. 764) Article based on AIAA Paper 2005-7446

C07-092 Extension of Projectile Range Using Oblique-Wing Concept. Lei Tang, Danny Liu, and Ping-Chih Chen, *ZONA Technology, Inc.* (**44**, 3, p. 774) Article based on AIAA Paper 2005-4600

C07-093 Local and Total Density Measurements in Ice Shapes. Mario Vargas, *NASA John H. Glenn Research Center at Lewis Field*; Howard Broughton, *Pace Levy, Inc.*; James J. Sims, *Universal Imaging Corporation*; Brian Bleeze, *ISPA Technology Inc.*; and Vatanna Gaines, *Lockheed Martin Aeronautics Company* (**44**, 3, p. 780) Article based on AIAA Paper 2005-0657

C07-094 Two-Dimensional Unsteady Aerodynamic Application to Higher Harmonic Control Test Data. Mark A. Couch, *University of Illinois*; and E. R. Wood, *Naval Postgraduate School* (**44**, 3, p. 790) Article based on AIAA Paper 2002-6017

C07-095 Characterization of Aircraft Wake Vortices by Airborne Coherent Doppler Lidar. Stephan Rahm, Igor Smalikho, and Friedrich Köpp, *DLR, German Aerospace Center, Germany* (**44**, 3, p. 799) Article

C07-096 Study on the Induced Velocity and Noise Characteristics of a Scissors Rotor. Guo-Hua Xu, Qi-Jun Zhao, and Yan-Hui Peng, *Nanjing University of Aeronautics and Astronautics, China (PRC)* (**44**, 3, p. 806) Article

C07-097 Reliability-Based Aircraft Structural Design Pays, Even with Limited Statistical Data. Erdem Acar and Raphael T. Haftka, *University of Florida* (**44**, 3, p. 812) Article based on AIAA Paper 2006-2059

C07-098 Drag Prediction in Transitional Flow Over Airfoils. Wassim Basha and Wahid S. Ghaly, *Concordia University, Canada* (**44**, 3, p. 824) Article based on AIAA Paper 2006-248

C07-099 Post-Stall Motions Evolving Toward Chaos. Simone Zuccher, *University of Verona, Italy*; and Sergio De Ponte, *Politecnico di Milano, Italy* (**44**, 3, p. 833) Article

C07-100 Development of a Trailing Vortex Formed with Spanwise Tip Jets. A. Gordon L. Holloway and Sean Richardson, *University of New Brunswick, Canada* (**44**, 3, p. 845) Article

C07-101 Multi-Objective Aerodynamic Exploration of Elements' Setting for High-Lift Airfoil Using Kriging Model. Masahiro Kanazaki, *Japan Aerospace Exploration Agency, Japan*; Kentaro Tanaka, *Ryoyu Systems Company, Ltd., Japan*; Shinkyu Jeong, *Tohoku University, Japan*; and Kazuomi Yamamoto, *Japan Aerospace Exploration Agency, Japan* (**44**, 3, p. 858) Article based on AIAA Paper 2006-1471

C07-102 Active Separation Control on the Flap of a Two-Dimensional Generic High-Lift Configuration. Ralf Petz and Wolfgang Nitsche, *Berlin University of Technology, Germany* (**44**, 3, p. 865) Article

C07-103 Effect of Oscillation on Boundary-Layer Development with Adverse Pressure Gradients. Konstantinos Kontis and Mohammad Amir, *University of Manchester, Great Britain* (**44**, 3, p. 875) Article

C07-104 CFD-Based Models of Aerodynamic Gust Response. Daniella E. Raveh, *Technion–Israel Institute of Technology, Israel* (**44**, 3, p. 888) Article based on AIAA Paper 2006-2022

C07-105 Predicting Maximum Lift Coefficient for Twisted Wings Using Lifting-Line Theory. Warren F. Phillips and Nicholas R. Alley, *Utah State University* (**44**, 3, p. 898) Article based on AIAA Paper 2007-1267

C07-106 Predicting Maximum Lift Coefficient for Twisted Wings Using Computational Fluid Dynamics. Nicholas R. Alley, Warren F. Phillips, and Robert E. Spall, *Utah State University* (**44**, 3, p. 911) Article based on AIAA Paper 2007-0898

C07-107 Automatic Transition Prediction and Application to Three-Dimensional High-Lift Configurations. Andreas M. Krumbein, *German Aerospace Center (DLR), Germany* (**44**, 3, p. 918) Article based on AIAA Paper 2006-3164

C07-108 Motion-Visual Phase-Error Detection in a Flight Simulator. Peter R. Grant, *University of Toronto, Canada*; and Peter T. Lee, Honeywell Aerospace, Canada (**44**, 3, p. 927) Article based on AIAA Paper 2005-5892

C07-109 Simplified Rotor Inflow Model for Descent Flight. Chang Chen and J. V. R. Prasad, *Georgia Institute of Technology* (**44**, 3, p. 936) Article

C07-110 Neuro-Fuzzy Techniques for the Air-Data Sensor Calibration. Marco Lando, Manuela Battipede, and Piero A. Gili, *Politecnico di Torino, Italy* (**44**, 3, p. 945) Article

C07-111 Dynamic Wing Airloads with Higher Harmonic Flap Motion. Tim Lee and P. Gerontakos, *McGill University, Canada* (**44**, 3, p. 954) Article

C07-112 Aerodynamic Characteristics of Paradrogue Assembly in an Aerial Refueling System. Kapseong Ro, Emre Basaran, and James W. Kamman, *Western Michigan University* (**44**, 3, p. 963) Article based on AIAA Paper 2006-0855

C07-113 Multipoint Aerodynamic Design of Wing-Body Configurations for Minimum Drag. Sergey Peigin, *Israel Aircraft Industries, Israel*; and Boris Epstein, *The Academic College of Tel-Aviv-Yaffo, Israel* (**44**, 3, p. 971) Article

C07-114 Fuzzy-Logic-Based Health Monitoring and Residual-Life Prediction for Composite Helicopter Rotor. Prashant Pawar and Ranjan Ganguli, *Indian Institute of Science, India* (**44**, 3, p. 981) Article

C07-115 Failure Forecasting of Aircraft Air Conditioning/Cooling Pack with Field Data. Ahmed Z. Al-Garni, Mueyyet Tozan, Abdullah Al-Garni, and Ahmad Jamal, *King Fahd University of Petroleum & Minerals, Saudi Arabia* (**44**, 3, p. 996) Article

C07-116 Aerodynamic Performance Analysis of a Gurney Flap for Rotorcraft Application. Kwanjung Yee, *Pusan National University, South Korea*; Wandon Joo, *Doosan Heavy Industries & Construction Co., Ltd., South Korea*; and Dong-Ho Lee, *Seoul National University, South Korea* (**44**, 3, p. 1003) Article

C07-117 Reduced Order Aerodynamic Model for Aeroelastic Analysis of Complex Configurations in Incompressible Flow. Hassan Haddadpour, *Sharif University of Technology, Iran*; Morteza Behbahani-Nejad, *Chamran University of Ahwaz, Iran*; and R. D. Firooz-Abadi, *Sharif University of Technology, Iran* (**44**, 3, p. 1015) Technical Note

C07-118 Comparison of Computational Fluid Dynamics Approaches for Simulating Weapons Bay Flow. Robert H. Nichols, *University of Alabama at Birmingham*; and Shawn Westmoreland, *Sverdrup Technology, Inc.* (**44**, 3, p. 1019) Technical Note based on AIAA Paper 2006-0455

C07-119 Surface Splines Generalization and Large Deflection Interpolation. Changchuan Xie and Chao Yang, *Beijing University of Aeronautics and Astronautics, China (PRC)* (**44**, 3, p. 1024) Technical Note

C07-120 Momentum-Impulse Balance and Parachute Inflation: Fixed Point Drops. Jean Potvin, *Saint Louis University* (**44**, 3, p. 1026) Technical Note

C07-121 Experimental Study of a Telescopic Morphing Aspect Ratio Wing Inside a Channel. Cheolheui Han, *Konkuk University, South Korea*; Seunghee Lee and Kuhyung Ruy, *Hanyang University, South Korea* (**44**, 3, p. 1029) Technical Note

C07-122 Semi-Active Control of Vertical Stroking Helicopter Crew Seat for Enhanced Crashworthiness. Gregory J. Hiemenz, Young-Tai Choi, and Norman M. Wereley, *University of Maryland* (**44**, 3, p. 1031) Technical Note

C07-123 Dynamic Coupling of the KC-135 Tanker and Boom for Modeling and Simulation. Austin L. Smith, *U.S. Air Force Research Laboratory*; and Donald L. Kunz, *Air Force Institute of Technology* (**44**, 3, p. 1034) Technical Note based on AIAA Paper 2006-6480

C07-124 Momentum-Impulse Balance and Parachute Inflation: Rocket-Propelled Payloads. Jean Potvin, *Saint Louis University* (**44**, 3, p. 1039) Technical Note

C07-125 Method for Multivariate Analysis with Small Sample in Aircraft Cost Estimation. Shou An Li and Bi Feng Song, *Northwestern Polytechnical University, China (PRC)*; and Heng Xi Zhang, *Air Force Engineering University, China (PRC)* (**44**, 3, p. 1042) Technical Note

C07-126 Interval Analysis-Based Optimum Design of Wing Structures Under Taxiing Loads. Luna Majumder and Singiresu S. Rao, *University of Miami* (**44**, 3, p. 1045) Technical Note

C07-127 Improved Dynamic-Stall-Onset Criterion at Low Mach Numbers. Wanan Sheng, R. A. McD. Galbraith, and Frank N. Coton, *University of Glasgow, Great Britain* (**44**, 3, p. 1049) Technical Note

C07-128 Problems with Leading-Edge Flow Control Experiments. Kailash Sunneechurra and William J. Crowther, *University of Manchester, Great Britain* (**44**, 3, p. 1052) Technical Note

C07-129 Morphing Wing Flight Control Via Postbuckled Precompressed Piezoelectric Actuators. Roelof Vos and Roeland De Breuker, *Delft University of Technology, The Netherlands*; Ron M. Barrett, *University of Kansas*; and Paolo Tiso, *Delft University of Technology, The Netherlands* (**44**, 4, p. 1060) Article

C07-130 Investigation of Self-Resetting Active Multistable Laminates. Marc R. Schultz, *Composite Technology Development, Inc.*; W. K. Wilkie, *Jet Propulsion Laboratory, California Institute of Technology*; and Robert G. Bryant, *NASA Langley Research Center* (**44**, 4, p. 1069) Article based on AIAA Paper 2005-1958

C07-131 Modeling and Flight Control of Large-Scale Morphing Aircraft. Thomas M. Seigler and David A. Neal, *Virginia Polytechnic Institute and State University*; Jae-Sung Bae, *Hankuk Aviation University, South Korea*; and Daniel J. Inman, *Virginia Polytechnic Institute and State University* (**44**, 4, p. 1077) Article

C07-132 Design and Testing of a Pneumatic Telescopic Wing for Unmanned Aerial Vehicles. Julie B. Samuel and Darryll J. Pines, *University of Maryland* (**44**, 4, p. 1088) Article

C07-133 Multidisciplinary Design Optimization and Data Mining for Transonic Regional-Jet Wing. Kazuhisa Chiba, Institute of Space Technology and Aeronautics, *Japan Aerospace Exploration Agency, Japan*; Akira Oyama, *Institute of Space and Astronautical Science, Japan Aerospace Exploration Agency, Japan*; Shigeru Obayashi and Kazuhiro Nakahashi, *Tohoku University, Japan*; and Hiroyuki Morino, *Mitsubishi Heavy Industries, Ltd., Japan* (**44**, 4, p. 1100) Article based on AIAA Paper 2005-5080

C07-134 Unsteady Thermodynamic Computational Fluid Dynamics Simulations of Aircraft Wing Anti-Icing Operation. Jun Hua, Fanmei Kong, and Hugh H.T. Liu, *University of Toronto, Canada* (**44**, 4, p. 1113) Article

C07-135 Computational Fluid Dynamics Study of Three-Dimensional Dynamic Stall of Various Planform Shapes. Agis Spentzos, George N. Barakos, Kenneth J. Badcock, Bryan E. Richards, F. N. Coton, R. A. McD. Galbraith, *University of Glasgow, Great Britain*; E. Berton, and D. Favier, *Laboratoire d'Aérodynamique et de Biomécanique du Mouvement, France* (**44**, 4, p. 1118) Article based on AIAA Paper 2005-1107

C07-136 Automated Aircraft Sheet Metal Component Production Technologies. K.S.R.K. Prasad, *Indian Institute of Technology, India*; P. Selvaraj, P. V. Ayachit, B. Anders V. Nagamani, and R. K. Ramanathan, *Aeronautical Development Agency, India* (**44**, 4, p. 1129) Article

C07-137 Supersonic Nonlinear Panel Flutter Suppression Using Shape Memory Alloys. Xinyun Guo, *Daniel Webster College*; Y.Y. Lee, *City University of Hong Kong, Hong Kong*; and Chuh Mei, *Old Dominion University* (**44**, 4, p. 1139) Article based on AIAA Paper 2005-2372

C07-138 Analysis Method for Inertial Particle Separator. Farooq Saeed and Ahmad Z. Al-Garni, *King Fahd University of Petroleum & Minerals, Saudi Arabia* (**44**, 4, p. 1150) Article based on AIAA Paper 2006-0014

C07-139 Why Birds and Miniscale Airplanes Need No Vertical Tail. Gottfried Sachs, *Munich University of Technology, Germany* (**44**, 4, p. 1159) Article based on AIAA Paper 2005-5807

C07-140 Methodology for Optimizing Parameters of Noise-Abatement Approach Procedures. Nhut T. Ho, *California State University, Northridge*; and John-Paul Clarke, *Georgia Institute of Technology* (**44**, 4, p. 1168) Article based on AIAA Paper 2005-7398

C07-141 Evaluation of a Simplified Grid Treatment for Oscillating Trailing-Edge Control Surfaces. Abdul M. Rampurawala and Ken J. Badcock, *University of Liverpool, Great Britain* (**44**, 4, p. 1177) Article based on AIAA Paper 2005-4962

C07-142 Response Surface Methods for Efficient Complex Aircraft Configuration Aerodynamic Characterization. Drew Landman, *Old Dominion University*; Jim Simpson, *Florida State University*; Daniel Vicroy and Peter A. Parker, *NASA Langley Research Center* (**44**, 4, p. 1189) Article based on AIAA Paper 2006-0922

C07-143 Experimental Training and Validation of a System for Aircraft Acoustic Signature Identification. Vincenzo Quaranta and Ignazio Dimino, *CIRA, The Italian Aerospace Research Centre, Italy* (**44**, 4, p. 1196) Article

C07-144 Topology Synthesis of Distributed Actuation Systems for Morphing Wing Structures. Daisaku Inoyama, *University of Dayton*; Brian Sanders, *U.S. Air Force Research Laboratory*; and James Joo, *University of Dayton* (**44**, 4, p. 1205) Article

C07-145 Hybrid Design for Aircraft Wind-Tunnel Testing Using Response Surface Methodologies. Drew Landman, *Old Dominion University*; Jim Simpson, *Florida State University*; Raffaello Mariani, *Old Dominion University*; Francisco Ortiz, *Florida State University*; and Colin Britcher, *Old Dominion University* (**44**, 4, p. 1214) Article based on AIAA Paper 2005-7602

C07-146 System-of-Systems Inspired Aircraft Sizing and Airline Resource Allocation via Decomposition. Muharrem Mane, William A. Crossley, and Antonius Nusawardhana, *Purdue University* (**44**, 4, p. 1222) Article

C07-147 Flowfield of a Rotating-Wing Micro Air Vehicle. Manikandan Ramasamy, J. Gordon Leishman, and Timothy E. Lee, *University of Maryland* (**44**, 4, p. 1236) Article

C07-148 Aerodynamic Loading for an Airfoil with an Oscillating Gurney Flap. Deman Tang and Earl H. Dowell, *Duke University* (**44**, 4, p. 1245) Article

C07-149 Effect of Acoustic Slat Modifications on Aerodynamic Properties of High-Lift Systems. Judith Ortmann and Jochen Wild, *DLR, German Aerospace Research Center, Germany* (**44**, 4, p. 1258) Article based on AIAA Paper 2006-3842

C07-150 Plasma Actuators for Hingeless Aerodynamic Control of an Unmanned Air Vehicle. Mehul P. Patel, Terry T. Ng, and Srikanth Vasudevan, *Orbital Research Inc.*; Thomas C. Corke and Chuan He, *University of Notre Dame* (**44**, 4, p. 1264) Article

C07-151 Residual Stress/Strain in Three-Row, Countersunk, Riveted Lap Joints. Gang Li, Guoqin Shi, and Nicholas C Bellinger, *National Research Council, Canada* (**44**, 4, p. 1275) Article based on AIAA Paper 2006-2269

C07-152 Experimental Investigation of Unsteady Flow Separation on a Maneuvering Axisymmetric Body. Serhat Hosder and Roger L. Simpson, *Virginia Polytechnic Institute and State University* (**44**, 4, p. 1286) Article

C07-153 Residual Strength of Panels with Cracks Based on a Plastic Hinge. Eric Hein, *Cessna Aircraft Company*; and Bert L. Smith, *Wichita State University* (**44**, 4, p. 1296) Article

C07-154 Structural Optimization of a Joined Wing Using Equivalent Static Loads. H. A. Lee, Y.I. Kim, and G.J. Park, *Hanyang University, South Korea*; R.M. Kolonay and M. Blair, *U.S. Air Force Research Laboratory*; and R.A. Canfield, *Air Force Institute of Technology* (**44**, 4, p. 1302) Article

C07-155 Probabilistic Approach to Damage Tolerance Design of Aircraft Composite Structures. Kuen Y. Lin and Andrey V. Styuart, *University of Washington* (**44**, 4, p. 1309) Article based on AIAA Paper 2006-2156

C07-156 Potential Impacts of Very Light Jets in the National Airspace System. Philippe A. Bonnefoy and R. J. Hansman, *Massachusetts Institute of Technology* (**44**, 4, p. 1318) Article

C07-157 Doubly Curved Anisotropic Sandwich Panels: Modeling and Free Vibration. Terry Hause, *Minnesota State University*; and Liviu Librescu, *Virginia Polytechnic Institute and State University* (**44**, 4, p. 1327) Article based on AIAA Paper 2006-2107

C07-158 Optimization of Aifoil Flow Control Using a Genetic Algorithm with Diversity Control. Liang Huang, George Huang, and Raymond P. LeBeau, University of Kentucky; and Thomas Hauser, *Utah State University* (**44**, 4, p. 1337) Article based on AIAA Paper 2004-225

C07-159 Adaptive Airfoil Dynamic Stall Control. Michael F. Kerho, *Rolling Hills Research Corporation* (**44**, 4, p. 1350) Article based on AIAA Paper 2005-1365

C07-160 Magnetometer Autocalibration Leveraging Measurement Locus Constraints. Demoz Gebre-Egziabher, *University of Minnesota* (**44**, 4, p. 1361) Article

C07-161 Influence of Vortex Core on Wake Vortex Sound Emission. Z C. Zheng and Wenhua Li, *Kansas State University*; Frank Y. Wang and Hadi Wassaf, *John A. Volpe National Transportation Systems Center* (**44**, 4, p. 1369) Article based on AIAA Paper 2006-2538

C07-162 Unsteady Aerodynamic Forces Mixed Method for Aeroservoelasticity Studies on an F/A-18 Aircraft. Ruxandra M. Botez, *Ecole de Technologie Superieure, Canada*; and Djallel E. Biskri, *Bombardier Aerospace, Canada* (**44**, 4, p. 1378) Technical Note

C07-163 Modeling the Benchmark Active Controls Wing Through Linear and Computational Aeroelastic Analyses. Neil V. Taylor, Ann L. Gaitonde, Dorian Jones, and Christian B. Allen, *University of Bristol, Great Britain* (**44**, 4, p. 1383) Technical Note

C07-164 Hub Drag-Reduction Strategies of Canard Rotor/Wing Unmanned Aerial Vehicles. Cheolwan Kim and JangYeon Lee, *Korea Aerospace Research Institute, South Korea* (**44**, 4, p. 1389) Technical Note

C07-165 Prediction of Hovering Rotor Noise Based on Reynolds-Averaged Navier–Stokes Simulation. Wen Ping Song, Zhong Hua Han, and Zhi De Qiao, *Northwestern Polytechnical University, China (PRC)* (**44**, 4, p. 1391) Technical Note

C07-166 Performance of Articulated Flapping Wings with Partial Leading-Edge Suction. Todd M. Reichert and James D. DeLaurier, *University of Toronto, Canada* (**44**, 4, p. 1395) Technical Note

C07-167 Effect of Gurney Flap on Unsteady Wake Vortex. Tim Lee and Lawrence Lee, *McGill University, Canada* (**44**, 4, p. 1398) Technical Note

C07-168 Harmonic Representation of Aerodynamic Lift and Drag Coefficients. Vladislav Apostolyuk, *National Technical University of Ukraine, Ukraine* (**44**, 4, p. 1402) Technical Note

C07-169 Experimental Evaluation of Sinusoidal Leading Edges. David S. Miklosovic and Mark M. Murray, *U.S. Naval Academy*; and Laurens E. Howle, *Duke University* (**44**, 4, p. 1404) Technical Note

C07-170 Lift and Drag Characteristics of a Blended-Wing Body Aircraft. David A. Gebbie and Mark F. Reeder, *Air Force Institute of Technology*; Charles Tyler, *U.S. Air Force Research Laboratory*; Vladamir Fonov and Jim Crafton, *Innovative Scientific Solutions, Inc.* (**44**, 5, p. 1409) Article based on AIAA Paper 2005-4719

C07-171 Preliminary Aerostructural Optimization of a Large Business Jet. Pat Piperni, Mohammed Abdo, and Fassi Kafyeke, Bombardier Aerospace, Canada; and Askin T. Isikveren, *University of Bristol, Great Britain* (**44**, 5, p. 1422) Article

C07-172 Active Tiltrotor Whirl-Flutter Stability Augmentation Using Wing-Flaperon and Swash-Plate Actuation. Rupinder Singh, Farhan Gandhi, and Jinho Paik, *The Pennsylvania State University*; and Eric Hathaway, *The Boeing Company* (**44**, 5, p. 1439) Article based on AIAA Paper 2005-2074

C07-173 Analysis and Design of Robust Helium Aerostats. Jonathan I. Miller and Meyer Nahon, *McGill University, Canada* (**44**, 5, p. 1447) Article

C07-174 Actuator-Work Concepts Applied to Unconventional Aerodynamic Control Devices. Christopher O. Johnston and William H. Mason, *Virginia Polytechnic Institute and State University*; Cheolheui Han, *Konkuk University, South Korea*; Harry H. Robertshaw and Daniel J. Inman, *Virginia Polytechnic Institute and State University* (**44**, 5, p. 1459) Article based on AIAA Paper 2004-4366

C07-175 Shape Memory Alloy Based Smart Landing Gear for an Airship. G. N. Dayananda, B. Varughese, and M. Subba Rao, *National Aerospace Laboratories, India* (**44**, 5, p. 1469) Article

C07-176 Coupled Vehicle Design and Network Flow Optimization for Air Transportation Systems. Christine Taylor and Olivier de Weck, *Massachusetts Institute of Technology* (**44**, 5, p. 1479) Article based on AIAA Paper 2005-2202

C07-177 Navier–Stokes Analysis of Airfoils with Gurney Flap. Manish K. Singh, Dhanalakshmi K., and Sunil K. Chakrabartty, *National Aerospace Laboratories, India* (**44**, 5, p. 1487) Article

C07-178 Compressible Unsteady Vortex Lattice Method for Arbitrary Two-Dimensional Motion of Thin Profiles. Paulo A. Soviero and Fabiano Hernandes, *Instituto Tecnológico de Aeronáutica, Brazil* (**44**, 5, p. 1494) Article based on AIAA Paper 2006-2998

C07-179 Application of CFD-Based Unsteady Forces for Efficient Aeroelastic Stability Analyses. Alexandre N. Marques, *Instituto Tecnológico de Aeronáutica, Brazil*; and Joao Luiz F. Azevedo, *Instituto de Aeronautica e Espaco, Brazil* (**44**, 5, p. 1499) Article based on AIAA Paper 2006-0250

C07-180 Optimum Shape Design for Unsteady Three-Dimensional Viscous Flows Using a Nonlinear Frequency-Domain Method. Siva Nadarajah, *McGill University, Canada*; and Antony Jameson, *Stanford University* (**44**, 5, p. 1513) Article based on AIAA Paper 2006-3455

C07-181 Nonlinear Flight Dynamics of Very Flexible Aircraft. Christopher M. Shearer and Carlos E. Cesnik, *University of Michigan* (**44**, 5, p. 1528) Article based on AIAA Paper 2005-5805

C07-182 Adaptive Stochastic Filtering for Online Aircraft Flight Path Reconstruction. Celso B. de Mendonça, *Empresa Brasileira de Aeronáutica, Brazil*; Elder M. Hemerly and Luiz Carlos S. Góes, *ITA, Brazil* (**44**, 5, p. 1546) Article

C07-183 Measured Statistics of Multicomponent Gust Patterns in Atmospheric Turbulence. John G. Jones, *Stirling Dynamics Ltd., Great Britain* (**44**, 5, p. 1559) Article

C07-184 Application of Probability Methods to Assess Airframe Crash Modeling Uncertainty. Karen H. Lyle, *NASA Langley Research Center*; Alan E. Stockwell, *Lockheed-Martin Space Operations*; and Robin C. Hardy, *NASA Langley Research Center* (**44**, 5, p. 1568) Article

C07-185 Computational Study of Submerged Air Inlet Performance Improvement Using Vortex Generators. César Celis Pérez, Sandro Barros Ferreira, and Luís Fernando Figueira da Silva, *Pontifícia Universidade Católica do Rio de Janeiro, Brazil*; Antônio Batista de Jesus and Guilherme Lara Oliveira, *Empresa Brasileira de Aeronáutica, Brazil* (**44**, 5, p. 1574) Article

C07-186 Streamwise Vorticity in Simple Mechanical Flapping Wings. YoungSun Hong and Aaron Altman, *University of Dayton* (**44**, 5, p. 1588) Article based on AIAA Paper 2006-0448

C07-187 Cartesian-Like Grids Using a Novel Grid-Stitching Algorithm for Viscous Flow Computations. Partha Mondal, N. Munikrishna, and N. Balakrishnan, *Indian Institute of Science, India* (**44**, 5, p. 1598) Article

C07-188 Thermal Buckling and Nonlinear Flutter Behavior of Functionally Graded Material Panels. Hesham H. Ibrahim, *Noon for Research and Development, Egypt*; Mohammad Tawfik, *German University in Cairo, Egypt*; and Mohammed Al-Ajmi, *Kuwait University, Kuwait* (**44**, 5, p. 1610) Article

C07-189 Aerodynamic Characteristics of a Free-Wing Tilt-Body Unmanned Aerial Vehicle. Kapseong Ro and Kaushik Raghu, *Western Michigan University*; and Jewel B. Barlow, *University of Maryland* (**44**, 5, p. 1619) Article

C07-190 Investigation of Surface Roughness on Aerodynamics Properties. Saeed Daneshmand, *Islamic Azad University, Iran*; Alireza Dehghani, *Islamic Azad University, Iran*; and Cyrus Aghanajafi, *Khajeh-Nasir Toosi University of Technology, Iran* (**44**, 5, p. 1630) Article

C07-191 Early Flight-Test and Other Boundary-Layer Research at Mississippi State 1949-1960. David H. Bridges, *Mississippi State University* (**44**, 5, p. 1635) Article based on AIAA Paper 2006-1121

C07-192 Experimental Aerodynamic Study of Tandem Flapping Membrane Wings. Jonathan Warkentin, InvoDane Engineering, Ltd., Canada; and James DeLaurier, *University of Toronto, Canada* (**44**, 5, p. 1653) Article

C07-193 Assessment of Ionosphere Spatial Decorrelation for Global Positioning System-Based Aircraft Landing Systems. Jiyun Lee, Sam Pullen, Seebany Datta-Barua, and Per Enge, *Stanford University* (**44**, 5, p. 1662) Article

C07-194 Autonomous Airborne Refueling of Unmanned Air Vehicles Using the Global Positioning System. Samer M. Khanafseh and Boris Pervan, *Illinois Institute of Technology* (**44**, 5, p. 1670) Article

C07-195 Analysis of Wind Tunnel Wall Interference Effects on Subsonic Unsteady Airfoil Flows. Karthikeyan Duraisamy, *University of Maryland*; William J. McCroskey, *U.S. Army Aeroflightdynamics Directorate*; and James D. Baeder, *University of Maryland* (**44**, 5, p. 1683) Article based on AIAA Paper 2006-2993

C07-196 Hybrid III Numerical Model for Aircraft Seat Crash Performance Assessment. Marco Anghileri, Luigi-M L. Castelletti, and Emanuele Fracasso, *Politecnico di Milano, Italy* (**44**, 5, p. 1691) Article

C07-197 Development and Testing of the Mentor Flapping-Wing Micro Air Vehicle. Patrick Zdunich, Derek Bilyk, Marc MacMaster, and David Loewen, *Advanced Subsonics, Inc., Canada*; James DeLaurier, *University of Toronto, Canada*; Roy Kornbluh, Tom Low, Scott Stanford, and Dennis Holeman, *SRI International* (**44**, 5, p. 1701) Article

C07-198 Flight Test Evaluation of a Helicopter Airborne Lidar. Naoki Matayoshi, *Japan Aerospace Exploration Agency, Japan*; Kimio Asaka, *Mitsubishi Electric Corporation, Japan*; and Yoshinori Okuno, *Japan Aerospace Exploration Agency, Japan* (**44**, 5, p. 1712) Article based on AIAA Paper 2005-6117

C07-199 Overview on Contrail and Cirrus Cloud Avoidance Technology. Frank Noppel and Riti Singh, *Cranfield University, Great Britain* (**44**, 5, p. 1721) Article

C07-200 Steep-Descent Maneuver of Transport Aircraft. Antonio Filippone, *University of Manchester, Great Britain* (**44**, 5, p. 1727) Article

C07-201 Comparative Flight Tests with and Without Tip Tanks. David F. Rogers, *U.S. Naval Academy* (**44**, 5, p. 1740) Article

C07-202 Two Aspects of Use of Full- and Partial-Span Gurney Flaps. Vojin R. Nikolic, *Minnesota State University* (**44**, 5, p. 1745) Technical Note

C07-203 Effect of Leading-Edge Form on Performance of Wing-Movable Tip Strake Configurations. Vojin R. Nikolic, *Minnesota State University* (**44**, 5, p. 1749) Technical Note

C07-204 Passive Control of Bluff Body Using Stepped-Nose Obstacle. Atique Rehman and Konstantinos Kontis, *University of Manchester, Great Britain* (**44**, 5, p. 1753) Technical Note

C07-205 In-Flight GPS-Signal-Reception Anomalies of Helicopters. Naoki Matayoshi and Yoshinori Okuno, *Japan Aerospace Exploration Agency, Japan* (**44**, 5, p. 1755) Technical Note

C07-206 Sensitivity of Aircraft Performance to Icing Parameter Variations. Scot E. Campbell, Andy P. Broeren, and Michael B. Bragg, *University of Illinois at Urbana–Champaign* (**44**, 5, p. 1758) Technical Note

C07-207 Experimental Study of a Micro Air Vehicle with a Rotatable Tail. Jose Rivera Parga; Mark F. Reeder and Troy Leveron, *Air Force Institute of Technology*; and Ken Blackburn, *U.S. Air Force Research Laboratory* (**44**, 6, p. 1761) Design Forum based on AIAA Paper 2005-4756

C07-208 High Resolution Turbulence Treatment of F/A-18 Tail Buffet. Scott A. Morton, Russell M. Cummings, and Denis B. Kholodar, *U.S. Air Force Academy* (**44**, 6, p. 1769) Article based on AIAA Paper 2004-1676

C07-209 Design "Feasilization" Using Knowledge-Based Engineering and Optimization Techniques. Joost Schut and Michel v. Tooren, *Delft University of Technology, The Netherlands* (**44**, 6, p. 1776) Article based on AIAA Paper 2006-0731

C07-210 Determination of Minimum Thrust Requirement for a Passenger Aircraft. Adel Ghenaiet, *Polytechnic School of Engineering, Algeria* (**44**, 6, p. 1787) Article

C07-211 Design of a Passively Reefed, Collapsible Drogue Parachute System. Stephen A. Whitmore, *Utah State University*; and Elsa J. Hennings, *Naval Air Warfare Center* (**44**, 6, p. 1793) Article based on AIAA Paper 2004-873

C07-212 Investigation of Relative Humidity and Induced-Vortex Effects on Aircraft Icing. Egemen O. Ogretim and Wade W. Huebsch, *West Virginia University*; Jim Narramore and Bob Mullins, *Bell Helicopter Textron Inc.* (**44**, 6, p. 1805) Article

C07-213 Aerodynamic Characteristics of Bodies of Revolution at Near-Sonic Speeds. Brenda M. Kulfan, John E. Bussoletti, and Craig L. Hilmes, *The Boeing Company* (**44**, 6, p. 1815) Article based on AIAA Paper 2007-0684

C07-214 Effects of Strake Planform Change on Vortex Flow of a Double-Delta Wing. Myong H. Sohn and Hyoung S. Chung, *Korea Air Force Academy, South Korea* (**44**, 6, p. 1842) Article based on AIAA Paper 2006-3498

C07-215 Unsteady Numerical Simulation of Wings with Flaperon Flying Over Nonplanar Ground Surface. Jeonghyun Cho, Jinsoo Cho, and Seawook Lee, *Hanyang University, South Korea* (**44**, 6, p. 1849) Article

C07-216 Return from Aerofoil Stall During Ramp-Down Pitching Motions. Wanan Sheng, R. A. McD. Galbraith, and Frank N. Coton, *University of Glasgow, Great Britain* (**44**, 6, p. 1856) Article based on AIAA Paper 2007-1075

C07-217 Effect of Streamwise Slots on the Drag of a Transonic Projectile. Ahmed Ibrahim and Antonio Filippone, *University of Manchester, Great Britain* (**44**, 6, p. 1865) Article

C07-218 Effect of Thrust-Vectoring Jets on Delta Wing Aerodynamics. Zhi-Jin Wang, Ping Jiang, and Ismet Gursul, *University of Bath, Great Britain* (**44**, 6, p. 1877) Article

C07-219 Aerodynamic Control of Using Windward-Surface Plasma Actuators on a Separation Ramp. Javier Lopera and T. T. Ng, University of Toledo; Mehul P. Patel, Srikanth Vasudevan, and Ed Santavicca, *Orbital Research Inc.*; and Thomas C. Corke, *University of Notre Dame* (**44**, 6, p. 1889) Article based on AIAA Paper 2007-0636

C07-220 Drag Decomposition-Based Adaptive Mesh Refinement. Wataru Yamazaki, Kisa Matsushima, and Kazuhiro Nakahashi, *Tohoku University, Japan* (**44**, 6, p. 1896) Article

C07-221 Forebody Geometry Effects on the Flow of a Blunt-Nose Projectile at High Alpha. Javier Lopera and T. T. Ng, *University of Toledo*; Mehul P. Patel and Russ Stucke, *Orbital Research Inc.* (**44**, 6, p. 1906) Article based on AIAA Paper 2007-461

C07-222 Aerodynamic and Mission Performance of a Winged Balloon Guidance System. Kerry T. Nock, Kim M. Aaron, Matthew K. Heun, and Alexey A. Pankine, *Global Aerospace Corporation* (**44**, 6, p. 1923) Article based on AIAA Paper 2007-2603

C07-223 Lift Enhancement by Static Extended Trailing Edge. Tianshu Liu, *Western Michigan University*; Javier Montefort and William Liou, *Western Michigan University*; S. R. Pantula, *Western Michigan University*; and Qamar Shams, *NASA Langley Research Center* (**44**, 6, p. 1939) Article

C07-224 Upstream Blowing Jet on Transonic Convex-Corner Flow. Kung-Ming Chung, *National Cheng Kung University, Taiwan (ROC)* (**44**, 6, p. 1948) Article based on AIAA Paper 2005-0644

C07-225 Error Quantification for Computational Aerodynamics Using an Error Transport Equation. Peter A. Cavallo and Neeraj Sinha, *Combustion Research and Flow Technology, Inc.* (**44**, 6, p. 1954) Article based on AIAA Paper 2007-4092

C07-226 New Computational Procedure for Incorporating Computational Fluid Dynamics into Sonic Boom Prediction. Sriram K. Rallabhandi and Dimitri N. Mavris, *Georgia Institute of Technology* (**44**, 6, p. 1964) Article based on AIAA Paper 2006-3312

C07-227 Distributed Rate-Dependent Elastoslide Model for Elastomeric Lag Dampers. Wei Hu and Norman M. Wereley, *University of Maryland* (**44**, 6, p. 1972) Article

C07-228 Closed-Form Analytical Solution for the Shimmy Instability of Nose-Wheel Landing Gears. Niranjan K. Sura, *Aeronautical Development Agency, India*; and S. Suryanarayan, *Indian Institute of Technology, India* (**44**, 6, p. 1985) Article

C07-229 Lateral Response of Nonlinear Nose-Wheel Landing Gear Models with Torsional Free Play. Niranjan K. Sura, *Aeronautical Development Agency, India*; and S. Suryanarayan, *Indian Institute of Technology, India* (**44**, 6, p. 1991) Article

C07-230 Lateral Response of Nose-Wheel Landing Gear System to Ground-Induced Excitation. Niranjan K. Sura, *Aeronautical Development Agency, India*; and S. Suryanarayan, *Indian Institute of Technology*, India (**44**, 6, p. 1998) Article

C07-231 Analysis of Visual Cues During Landing Phase by Using Neural Network Modeling. Ryota Mori and Shinji Suzuki, *University of Tokyo, Japan*; Yuki Sakamoto and Hiroshi Takahara, *All Nippon Airways, Japan* (**44**, 6, p. 2006) Article based on AIAA Paper 2006-6498

C07-232 Bending of Bonded Composite Repairs for Aluminum Aircraft Structures: A Design Study. Randal J. Clark and Douglas P. Romilly, *University of British Columbia, Canada* (**44**, 6, p. 2012) Article

C07-233 Investigation of the Effect of Metallic Fuselage Dents on Compressive Failure Loads. Nann C. Lang and Young W. Kwon, *Naval Postgraduate School* (**44**, 6, p. 2026) Article

C07-234 Assessment of Critical Fuel Configurations Using Robust Flutter Analysis. Sebastian Heinze, *Royal Institute of Technology, Sweden* (**44**, 6, p. 2034) Article based on AIAA Paper 2006-2279

C07-235 Optimum Aeroelastic Design of a Flapping Wing. Koji Isogai and Yohei Harino, *Nippon Bunri University, Japan* (**44**, 6, p. 2040) Article

C07-236 Parametric Studies on Ground Vibration Test Modeling for Highly Flexible Aircraft. Chong-Seok Chang and Dewey H. Hodges, *Georgia Institute of Technology* (**44**, 6, p. 2049) Article

C07-237 Proposal to Use Reaction Jets for Variable Stability Airplanes. Brijesh Kumar and S. Pradeep, *Indian Institute of Science, India* (**44**, 6, p. 2060) Technical Note

C07-238 Ground Dynamics Model Validation by Use of Landing Flight Test. Michel Nadeau Beaulieu, Ruxandra M. Botez, and Adrian Hiliuta, *École de Technologie Supérieure, Canada* (**44**, 6, p. 2063) Technical Note based on AIAA Paper 2006-6811

C07-239 Improving the Stability and Efficiency of the Pseudocompressibility Method. Junke Ye, Bifeng Song, and Wenping Song, *Northwestern Polytechnical University, China (PRC)* (**44**, 6, p. 2068) Technical Note

C07-240 Bending-Torsion Divergence of a Clamped-Clamped Composite Wing. Dewey H. Hodges, *Georgia Institute of Technology* (**44**, 6, p. 2070) Technical Note

C07-241 Specific Weight: A Challenge for a Fuel-Cell-Powered Electric Helicopter. Domingo M. Guinea, *Ceramics and Glass Institute, Spain*; Miquel Roura, *Politechnical University, Spain*; María del Carmen García-Alegre, Ángela Ribeiro, and Domingo Guinea, *Industrial Automation Institute, Spain* (**44**, 6, p. 2073) Technical Note

C07-242 Evaluation of Effectiveness of Periodic Flight by a Hypersonic Vehicle. Takeshi Kanda and Tetsuo Hiraiwa, *Japan Aerospace Exploration Agency, Japan* (**44**, 6, p. 2076) Technical Note

C07-243 Effect of High-Altitude Airship's Attitude on Performance of its Energy System. Haifeng Wang, Bifeng Song, and Liankai Zuo, *Northwestern Polytechnical University, China (PRC)* (**44**, 6, p. 2077) Technical Note

C07-244 Experimental Studies on Unsteady Lateral Blowing on NACA 0012. Chi Wong and Konstantinos Kontis, *University of Manchester, Great Britain* (**44**, 6, p. 2080) Technical Note

C07-245 Aerodynamic Hysteresis of a Low-Reynolds-Number Airfoil. Hui Hu, Zifeng Yang, and Hirofumi Igarashi, *Iowa State University* (**44**, 6, p. 2083) Technical Note

C07-246 Reduced-Order-Model-Based Flutter Analysis at High Angle of Attack. Weiwei Zhang and Zhengyin Ye, *Northwestern Polytechnical University, China (PRC)* (**44**, 6, p. 2086) Technical Note
